Lancaster Farming

Vol. 19 No. 47 | Lancaster Farming, Saturday, October 5, 1974 | $2.00 Per Year

Michael Martin, New Holland RD2, and Linda High, 2490 Creek Hill Rd., Lancaster, took grand and reserve grand championships, respectively, on Thursday afternoon at the New Holland Fair baby beef show. It was Mike's very last year of competition, and his very first grand championship.

Winners Named At New Holland

Mike Martin won his first grand championship in ten years of showing at the New Holland 4-H Baby Beef Club show on Thursday afternoon at the New Holland Community Fair. In hog competition, young Tom Ruoss copped his second grand championship in as many years in the contest which followed the beef contest.

Mike is the son of Mr. and Mrs. Robert Martin, New Holland R2. His 1500-lb. steer went to the New Holland Sales Stable after the show, where it was sold to restauranteur Paul Smucker, owner of the Bird-in-Hand Motor Inn. Smucker paid $1.14 a pound for the meaty crossbred. For his efforts in the showring, Mike received $1197 from Smucker, and a $5 bill from Abe Diffenbach, the sales stable manager who gave $5 to every one of the 26 participants in the baby beef show.

The 26 steers, all exhibited and sold by members of the New Holland 4-H Baby Beef Club, was the largest such event in several years, according to Mike's father, who is the club leader.

The reserve champion baby beef, a Hereford, was shown by Linda High, daughter of Mr. and Mrs. Harvey High, 2490 Creek Hill Road.

Linda's steer sold for 75 cents a pound to Frank Fillippo, a cattle dealer from Norristown.

Linda also showed the grand champion baby beef of the Ephrata Fair last Thursday, a crossbred.

The remaining 24 steers

Hearing Set for Oct. 15 . . .

Inter-State Sues PMMB for Action

Inter-State Producers Cooperative has been granted a day in court to present charges against the Pennsylvania Milk Marketing Board for the Board's failure, as Inter-State put it because the board, in Inter-State's opinion, has completely failed to carry out the state's milk marketing law.

In a statement on the hearing, which is set for October 15 in Commonwealth Court, Harrisburg, the coop said, "The PMMB has totally failed in its duty to set proper farm prices for milk. Inter-State has asked the courts to direct the PMMB to immediately issue current price orders on hearings held by the PMMB more than one year ago."

Dr. Paul Hand, economist for the producers group which represents 2,400 Pennsylvania dairy farmers, said that a hearing was held by the marketing board last November on a dairyman's request for price increase ranging from $1 to $1.30 per hundredweight.

This increase, Dr. Hand said, would represent an increase of from two to three cents per quart.

With the current cost situation, Dr. Hand said, the increase should be written in an order from the marketing board.

Because the board failed to write an order, a complaint (calling for a court mandate for action) was filed Sept. 24.

Since that suit was filed, Dr. Hand said, the marketing board has announced it will hold a pre-order conference in Harrisburg on Nov. 8.

Presumably, Dr. Hand said the purpose of the Nov. 8 conference is for the board to announce what they intend to do as the result of hearings held almost a year ago.

Inter-State filed the complaint for three individual dairy farmers and on behalf of all its members. The three farmers are Daniel Martin, Manheim, an Inter-State director; Samuel Black, Tyrone; and Willis Greaser, Williamsburg.

The Coop said it has the support of other farm organizations, such as the Pennsylvania Farmers Association, in its action against the milk board.

Dairymen Urged To Watch Costs

"Dairymen have always tried to please the cows in their feeding programs. But now, it's time for the dairyman to please himself rather than his cows. Because if he doesn't, he's going to be losing a lot of money," Dr. Richard Adams, Penn State's extension dairy specialist told a crowd of milk producers on Monday night at the Lancaster Farm and Home Center.

"Even if support prices are increased," Adams said, "we still won't be able to feed cows the same way we fed them two years ago. The most important thing you can do in a bad feed price situation is to use only that amount of feed that can be economically justified. We've known for a long while that there are times when it pays to feed a cow less than she needs to have for absolutely top production. This is one of those times."

Among the steps Adams recommended were to reduce grain feeding and, especially, to watch the price of grain, and to shop around for the best price. He reported that he'd been in a small northeastern Pennsylvania town recently, and found a $3 difference in the price of soybean oil meal from dealers on opposite ends of town.

Reducing the cost of raising recplacements was another area where Adams thought farmers could save

Mike Grube - A Winning 4-Her

Mike Grube has won a number of prestigious awards for a young man his age. For the past few years he has been interested in livestock judging and his knowledge has paid off several times both in winning awards for livestock judging classes and in selecting animals.

Mike was a member of 4-H for 10 years beginning when he was nine years old. He carried a number of projects including market hogs, steers, field and sweet corn and teen leadership.

He was a member of the Elm-Penryn Community Club and also belonged to the Red Rose Baby Beef Club. While in 4-H, Mike competed on the County Livestock judging teams in both the junior and senior divisions. While on the Junior Team, Mike judged at the 4-H State Days placing third on the team. That year, the team also placed first in state competition.

This summer, Mike competed on the senior livestock judging team. At the York county contest the team placed second and Mike was high individual judge in hogs.

During the 4-H Achievement Festival this summer the team placed 5th and Mike was 20th in individual competition out of 120 4-Hers.

(Continued On Page 17)

Market hogs has been one of Mike's projects for the past few years.

Lampeter Sale Sets Records

Lampeter-Strasburg's Garden Spot FFA Chapter held their annual market hog and steer sale last Friday at the close of the West Lampeter Fair. The grand champion FFA steer, a Charolais-Angus cross brought $1.60 a pound, which was paid by Willow Valley Farms, of Willow Street.

The 1125-pound animal was raised by John Harnish,

IMPORTANT NOTICE

LET US HANDLE YOUR FEEDER PIGS

NEXT FEEDER PIG SALE TUES. OCT. 15

As a result of increased receipts and popular demand on the part of both buyers and seller, Bi-monthly Feeder Pig Sales will be held at the Lancaster Stockyards.

Feeder pigs consigned to Walter M. Dunlap and Sons must arrive at the stockyards between 7 A.M. and 11A.M. the day of the sale. Upon arrival they will be inspected by a veterinarian, tagged, and state graded.

The two sales scheduled for October will be held on Tuesday, the 1, and Tuesday, the 15, starting at 1 P.M. Consignors wishing to tag their pigs on the farm can get the tags at the state office at the stockyards, not later than 4 P.M. any day preceding the sale, thereby saving 25 cents per pig.

Consign all your feeder pigs to Walter M. Dunlap & Sons where they will be handled by a capable and experienced staff, and for further information call 717—397-5136.

Omaha Cattle

Thursday, October 3

Weekly 51 – CATTLE – compared with the previous week's close, closing prices on slaughter steers steady to 50 cents higher, Heifers steady to 25 cents lower. Cows 2.00-3.00 lower. Bulls mostly steady.

Four day receipts 14,100 as compared 13,900 previous week and 13,800 a year ago. Steers approximately 30 percent, week's total, heifers 21 percent, cows 12 percent and feeders 35 percent. Bulk of the feeders for Friday auction. The decline in fed cattle prices of recent weeks continued on Monday as steer and heifer prices were pushed sharply lower. However, the downturn was erased in later trading supported by very moderate supplies and sharply advancing prices in the wholesale carcass trade. Midweek demand good on slaughter steers and heifers were higher for the first time in several weeks.

STEERS: Approximately seven loads Choice and Prime 1063-1150 pounds yield grade 3-4 41.00-41.25. Bulk Choice 975-1250 lbs. yield grade 2-4 39.25-40.50. Choice 925-975 lbs. 38.50-29.25. Six loads Choice and Prime 1260-1375 lbs. predominantly yield grade 4 but some yield grade 5 included 38.25-39.00. Mixed Good and Choice 925-1200 lbs. 38.00-39.25. Good 36.00-38.00. Standard and low-Good 34.00-36.00.

Average cost slaughter steers first three days 38.52 average weight 1097 lbs. as compared 39.27 and 1087 lbs. previous week and 41.48 and 1120 lbs. a year ago.

HEIFERS: Three loads Choice and Prime 977-1077 lbs. yield grade 3-4 39.75-40.00. Choice 825-1035 lbs. yield grade 2-4 38.00-39.50. Load 1022 lbs. 39.60. Mixed Good and Choice 750-1000 lbs. 37.00-38.25. Good 35.00-37.00. Small lots Standard and Good 33.50-35.00.

COWS: Utility and Commercial 18.00-19.00, some high-yield Utility 19.50 and one small lot Holsteins 20.00. Canner and cutter largely 14.50-18.00.

BULLS: Yield grade 1 & 2 1400-1800 lbs. 24.00-28.00.

Eastern Pa. & N. J.

THE OLD FARMER'S ALMANAC

OCT. 7-13, 1974

The mellow year is hastening to its close.

Apple cider should be just about perfect this year . . . Wendell Willkie died Oct. 8, 1944 . . . Third quarter of the Moon Oct. 8 . . . Leaves falling now . . . Average length of days for the week, 11 hours, 23 minutes . . . Professional baseball players earned $12 a game in 1879 . . . D.A.R. established Oct. 11, 1890 . . . First U.S. locomotive Oct. 8, 1829 . . . Columbus lands in "new" world Oct. 12, 1492 . . . U.S. Naval Academy founded Oct. 10, 1845 . . . Matrimony is the only game of chance that the clergy favor.

Old Farmer's Riddle: What does the barber find the easiest thing to part with? (Answer below.)

Ask the Old Farmer: We want to go up to New England and see the spectacular fall foliage. We'd like to catch it at its peak. When would that be? H.D., Newark, N.J.

Now's a good time. But in our judgment the peak of foliage shouldn't be before the second frost. As to when that will come, only the good Lord knows and there are times when we wonder if He is real certain about it.

Home Hints: Keep white vegetables, such as onions and cauliflower, from turning yellow during cooking by adding a little lemon juice or vinegar to the cooking water . . . *Riddle Answer:* a comb.

OLD FARMER'S WEATHER FORECASTS

New England: Clear and warm most of week; light rain and cooler by weekend.

Greater New York-New Jersey: Cloudy to start, then clearing and warm; cool and rainy by weekend.

Middle Atlantic Coastal: Partly cloudy and very warm at first, then clear and pleasant; rain by weekend.

Southeast Coastal-Piedmont: Early week coastal rain and cloudy inland; end of week clearing and quite warm.

Florida: Rain all week in central and south; early week rain in north, then clearing.

Upstate and Western New York-Toronto & Montreal: Most of week generally clear and warm; rain and cooler by weekend.

Greater Ohio Valley: Mostly clear and hot to start; rain, moderately heavy at times, and cooler latter part.

Deep South: Sunny and hot at first, then cloudy and cooler; light rain latter part.

Chicago and Southern Great Lakes: Mostly sunny and hot all week; rain and cooler by weekend.

Northern Great Plains-Great Lakes: Early week partly clear and becoming very warm; showers and cooler latter part.

Central Great Plains: First part of week clear and hot; late week rain in east and south and cooler.

Texas-Oklahoma: Increasing cloudiness and quite cool at first; rain and continued cool latter part.

Rocky Mountain Region: Cloudy and cool to start, then showers; end of week clearing and much warmer.

Southwest Desert: Variable cloudiness with highs near 100 most of week; slightly cooler latter part.

Pacific Northwest: Rain to start, then cool; end of week clearing and warmer.

California: Light rain at first, then clear and unseasonably warm to end of week.

Pennfield Starts New Egg Processing Plant

Pennfield Corporation's Egg Division, the L. M. Sheaffer Company, has broken ground to construct a modern new 31,900 square foot processing plant and office building. The new plant will be located on the Schoeneck Road at the site of Pennfield Farms, present quarters of the processing complex. The construction is being handled by Buckwalter Construction, Inc. of Lancaster. Serving as both engineer and architect is St. Onge, Ruff & Associates of York.

Tuesday, Ephrata Mayor Lloyd Gerhart; Borough Manager, Carl Fuehrer; and County Agent, Max M. Smith, joined Ernest Horn, Sr., Pennfield Chairman of the Board; Robert Graybill, Pennfield President; and Don Horn, Egg Division general manager, to officially turn the first spadeful of dirt.

Spring of 1975 is set for completion date of the complex which will include a processing and packaging building, a refrigerated egg storage area, office quarters, employee facilities and a company store. The store will provide Pennfield eggs and poultry products for both employees and outside consumers. The present plant will become an annex of the complex and will be used as a dry storage warehouse for materials.

The plant will be equipped with the latest and most efficient egg processing equipment available. It will be fully air conditioned and will include the latest in sanitation provisions.

Upon completion, Pennfield's new plant will more than double the company's egg processing and packaging capacity. When operating at maximum capacity, six million eggs per week will leave Ephrata for shipment to the company's Delaware Valley market area. The processing plant will handle the output of 1.3 million Pennsylvania chickens.

Don Horn said the company hoped to achieve better quality control and more production efficiency by combining all egg processing activity in one location. Upon completion of the new facility, the processing plant now in operation on Chestnut Street in Ephrata will be sold.

Lancaster County Agricultural Agent Max Smith, left, Pennfield president Robert Graybill, and Pennfield board chairman Ernest Horn, Sr., were among the dignitaries attending a groundbreaking ceremony Tuesday for a new egg processing plant at Pennfield Farms, Ephrata. Pennfield's egg division, L. M. Shaeffer Co., will process all its eggs at the farm upon completion of the plant. Eggs from contract growers are now processed in a downtown Ephrata plant.

ANNIVERSARY SUPER SPECIALS

ANIMAL MEDIC is having its 4th anniversary and we'd like you, our farmer friends and customers to help us celebrate by doing some advertising for us. You see some companies spend thousands of dollars advertising in national magazines. Instead of doing this we are going to pass this money along to you in the form of TERRIFIC SAVINGS on the products listed below. Because we know, YOU, the SATISFIED CUSTOMER is the best advertisement of all.

DISEASE PREVENTION and CONTROL

MASTITIS PREVENTION DRY MEDIC

Are you aware that the majority of cows in an average herd have mastitis that you do not know about?? Prevent flareups at freshening and help eliminate profit - robbing sub-clinical mastitis. Treat **every** dry cow with: - DRY MEDIC.

REGULAR per 4 dose syringe $2.10

SALE 12 or more at **$1.49**

COST PER DOSE ... only .37c

containing 100,000 units of procaine penicillin G and 250 mg of neomycin base

SOMATO STAPH

Anchors mastitis vaccination for staph mastitis

REGULAR per 250 cc (50 dose) bottle $32 50

per 250 cc (50 dose) Bottle $22.50

Save $10.00.

MASTITIS TREATMENT -- BRAND X

Because we are not allowed to use the brand name, here is the formula for brand X to treat mastitis: Eadh 10 ml. syr. contains 100,000 units procaine penicillin G, 100 mg. Dihydrostreptomycin, 300 mg. of sulfamerazine and 20 mg. of hydrocortisone. 72 hour withdraw and 11-74 dating sold as high as $12.00 per dozen.

1 doz. (12 - 10cc syringes) $4.95

2 doz. (24 - 10cc syringes) $8.95

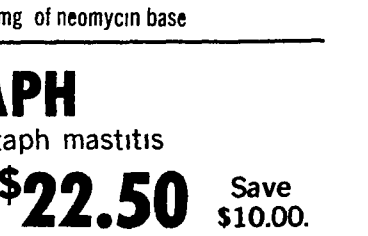
MEDIC BOOSTER BOLUS

Get cows off to a better location. Give every fresh cow MEDIC BOOSTER BOLUSES. These high potency boluses contain immediately available energy, amino acids, electrolytes and vitamins Dairymen report cows start producing better with less ketosis type problems. Try them today!!

REGULAR JAR OF 25 $9.95

SALE 2 or more **$7.95**

TRAMISOL WORMERS



TRAMISOL CATTLE WORMER PELLETS.

SAVE $5.00 PER 10 LB. BAG

REGULAR $22.95 **$17.95** Save $5.00

REGULAR $99 95 **$74.95** Save $25.00 per 50 lb. bag

TRAMISOL INJECTABLE: REGULAR $12 95 **$9.95** per 100 cc save $3.00

REGULAR $59.95 **$44.95** per 500 cc save $15.00

TRAMISOL PIG WORMER PER 500 CC BOTTLE SAVE $2.00 REG $10 95 **SALE $8.95**

AUREO PLUS CRUMBLES

DOUBLE THE STRENGTH OF REGULAR CRUMBLES

Each pound contains· 4 gms. of chlortetracycline plus 100,000 units of vitamin A and 25,000 units of vitamin D3.

BEEF CATTLE
Upon arrival and for 10 days add 17 5 pounds per ton of feed (to prevent shipping fever) if feed consumption is 10 pounds per head. After 10 days feed Aureo Plus Crumbles continuously at low level to promote growth and feed efficiency

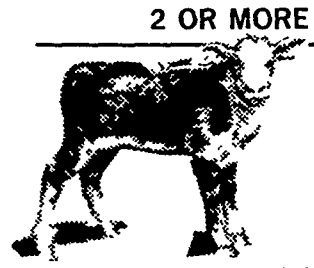
DAIRY CATTLE
Feed at low level to prevent foot rot and perhaps some mastitis problems.

POULTRY
Add to feed for prevention of chronic respiratory disease and for treatment of Blue Comb.

SWINE
Add to feed for growth promotion and improve feeding efficiency and-or treat bacterial scours.

REGULAR per 50 lb bag $19.95 ea. **$12.95** (SAVE $7.00 per bag)

2 OR MORE PER 50 LB. BAG



CALF SCOUR PREVENTION

CALF SCOUR MEDIC

CALF SCOUR MEDIC BOLUSES contain (2) very effective antibiotics Neomycin that stays in the gut and intestinal tract to kill scour causing bacteria and oxytetracycline that filters out into the blood to take care of the cold and pneumonia type problems, PLUS good levels of vitamins A and D and niacinamide to increase resistance to infection and help get your calf off to a faster healthier start For prevention of scour and cold, pneumonia problems give 2 boluses the first day of life and 1 per day for the first 3 weeks Also very effective for treatment

REGULAR PER 10 $3 49 — **per 10 Save $1.00 $2.49**

REGULAR per jar of 25 $7.99 — **per jar of 25 Save $2.00 $5.99**

REGULAR per jar of 50 $15.95 — **per jar of 50 Save $5.00 $10.95**

CALF SCOUR TREATMENT

CALF SCOUR MEDIC XTRA

Boluses contains neomycin and sulfaquandine, both stay in the gut and intestinal tract to kill scour causing bacteria Sulfamethazine filters into the blood to treat cold and pneumonia type problems kaolin to absorb liquids and pectin to coat the tender linings of the intestinal tract

REGULAR per jar of 50 $16 95 **SALE $11.95** Save $5.00

National 4-H Week

by:
Melissa Piper
Associate Editor

October 6th - 12th will mark the celebration of National 4-H Week. 5½ million 4-Hers throughout the nation and in 85 countries throughout the world will consider this their special week.

4-H is one of the few organizations that has been accepted and has grown throughout the world despite language barriers and political conflicts.

Perhaps one reason for its success is that 4-H offers meaningful projects in a myriad of interest areas and also offers young people an opportunity to meet and discuss world problems whether in agriculture or homemaking.

"Learn by doing" has been the 4-H motto for many years and serves as a good description of what 4-H really entails. For 4-H means that young people can learn responsibility and citizenship by interacting with others at meetings as well as by learning self discipline in doing personal projects.

It has been my privilege for the past few months to work with many of the 4-Hers in this area and I have found most of them to be well disciplined, eager to work and dedicated to making their best better.

I have truly been amazed at times at the projects that the young people have made. From crocheting afghans to building lawn furniture it amazes me at the talent and dedication these young people put forth in their work.

I was also a 4-Her for a number of years, coming into 4-H at a time when cooking and livestock projects were the only projects available; however, in the past few years I have seen projects ranging from knitting to rocketry become popular.

In fact the Extension leaders recently told me that there is no longer a requirement that a project have a project book and strict guidelines. For as long as there are interested leaders who have a specific talent for interest they can organize an interest club.

Perhaps the most noteworthy of all the 4-H objectives, however, has been their willingness to aid in the area of conservation. By learning about conservation in their younger years these young people have helped in many ways whether by cleaning up a park or redesigning a stream.

I strongly believe that we should encourage these young people in all phases of their work as they will be the leaders of tomorrow.

Congratulations to all our area 4-H clubs as they celebrate National 4-H Week.

Farm Commentary

CASH RECEIPTS: IOWA EDGES CALIFORNIA

Iowa supplanted California as the leading State in cash receipts from farming and North Dakota edged out Kansas as the leader in cash receipts from Wheat in 1973, according to a FIS 224 report issued last week.

The report shows Iowa had cash receipts of $7.363 billion for all commodities last year to edge out California, which had a $7.220 billion total California had led the Nation each year from 1949 through 1972. Cash receipts for all commodities totaled a record $88.590 billion, up from $60.993 billion in 1972, the previous high.

The report shows that the leading 10 States in cash receipts accounted for 53 pct. of all cash receipts. Ten States accounted for 53 pct. of the $46.244 billion in cash receipts for livestock, and 10 States accounted for 57 pct. of the Nation's total of $42.346 billion for crops.

North Dakota, with a total of $1.122 billion, edged out Kansas to lead the Nation in cash receipts for wheat Kansas' total was $1 105 billion. Only one other time in recent memory - it was North Dakota again in 1968 - did any State other than Kansas lead in receipts for wheat

Iowa led the Nation in cash receipts for all livestock, for hogs and corn, was second in cash receipts for soybeans and third in receipts for cattle and calves and for all crops. California led the Nation in cash receipts for all crops, eggs, greenhouse and nursery, hay, grapes, tomatoes, and sugar beets. It was 3rd in cash receipts for livestock, cotton, dairy products, potatoes, and barley. It was 2nd in receipts for oranges, 4th for grain sorghum, rice and apples.

PER FARM NET INCOME DOUBLED

Total net income per farm hit a record **high** $6,410 in 1972. Last year, it **nearly doubled** to hit a new record high $12,744, USDA reported last week.

Net income ranged from an average on only $972 per farm in West Virginia to $36,026 in California. The latter took over the Nation's leadership from Arizona for only the second time since 1949. Arizona's farmers averaged $33,041 last year. Over-all, nine States showed a net income average per farm of over $20,000. (Farm Income State Estimates, 1949-73)

HONEY OUTPUT SEEN DOWN

Commerical honey output - that's from apiaries with 300 or more colonies in the 20 leading States - estimated at 99.7 million lbs., USDA reported last week That's down 24 pct from a year ago, 17 pct. below the 1972 total

Farm Calendar

Monday, October 7

8:00 p.m. - Lancaster County Poultry Association Meeting, Farm and Home Center, Lancaster.

Wednesday, October 9

9:00 a.m. - Statewide personnel management seminar for the poultry industry, Farm and Home Center, Lancaster.

Manheim Community Fair. Continues through October 11.

Unionville Community Fair. Continues through October 11.

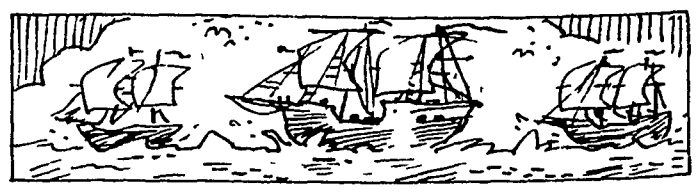
Thursday, October 10

Elizabethtown Adult Farmers Evening meeting. Topic is fire prevention.

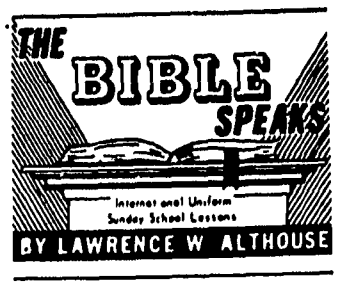
Saturday, October 12

1:00 p.m. - Garden tractor pull, Rough and Tumble Historical Assoc. grounds, Kinzer. Followed by a four-wheel drive pull at 6:00 p.m.

61st annual horticulture show, Penn State, Ice Pavilion. Continues through October 13.



The first convoy of ships that took criminals to Australia was called the First Fleet, and in time, to be a descendant of a "first fleeter," became a matter of pride.



A LEADER FOR GOD

Lesson for October 6, 1974

Background Scripture: 2 Samuel 7
Devotional Reading: 2 Samuel 7:12-20.

If perfection were a qualification for the leadership of God's people, David would never have made the grade. He was, the Bible makes clear, an imperfect man of mistakes, vices, weaknesses, and some serious sins.

Nevertheless, the Jews have long revered him as their ideal king and the period of his reign is regarded as the "Golden Age" of Israel. Most of all, he is remembered as a great "man of God."

"I took you . . ."

How can we explain this seeming paradox between David's imperfections and his greatness?

First, the Bible makes it clear that one reason for David's great leadership is to be found in his selection by God for that purpose. The story of David is not just a success story of a man who by sheer ambition and talent lifts himself up to great heights of popular trust and acclaim. David was both ambitious and talented, but it was God who set his course when he chose David to become a leader for his people. "Thus says the Lord of hosts," pronounced the Prophet Nathan to David, "I took you from the pasture, from following the sheep, that you should be prince over my people Israel . . ." (2 Samuel 7:8). God saw in David the youth the potential for leadership and he marked him for growth toward that goal.

Then too, God has also been with him throughout his life, helping David toward this goal. "I have been with you wherever you went, cutting off all your enemies from before you . . ." (7:9). God has been at work in David's life and it has not been luck that has brought David to his place of prominence. This doesn't mean that David has been a passive puppet in God's hand. He could have rejected God's call and resisted his help. Instead, however, David has responded to God's help and direction and because of his response God's purpose for David was being fulfilled.

"I will make you . . ."

Furthermore, God will continue to work through David until his promise to David is realized: "I will make for you a great name, like the name of the great ones of the earth" (7:9). David's greatness, then, is dependent upon two things: God's promise and David's response to that promise.

What was David's response?

For all of his mistakes and weaknesses, David can see God's hand at work in his life. Proud though this king must have been, he was humble enough to acknowledge the greatness and glory of God: "Therefore, thou art great, O Lord God; and there is no God besides thee . . ." (7:21).

No perfection, but a humble response is the qualification for a leader of God's people.

NOW IS THE TIME. . .

To Check Corn Moisture

The making of high-moisture corn is becoming more common in this area. It is important to know the moisture content of the corn before storing by this method. Ground ear corn should be from 30 to 35 percent moisture with 32 per cent being ideal. High-moisture shelled corn should be from 25 to 30 per cent with 28 per cent being the best. We are aware of some growers trying to ensile these crops at much higher moisture content. This may result in stronger-flavored poorer-quality corn. If the corn gets too dry and below these moisture percentages, then water may be added at the rate of 2½ gallons of water per ton for each percent mositure to be added.

To Utilize Frosted Soybeans

The growing season for soybeans ended quickly last week. Many of the double-crop beans were not mature and will not develop after the leaves have been killed. This means that some growers may want to make silage from their later plantings. Also, they may be made into hay providing the leaves have not dropped before being cut. Some dairy and livestock operators may want to harvest the entire stalk and grind them into the grain mixture this fall and winter. Beans that were mature and hard at the time of the frost should not be harmed and will dry more quickly in the next few weeks.

To Sow Cover Crops

The planting of a cover crop this fall to avoid having open ground is a good practice. Winter rye or domestic ryegrass are two very common crops that may be seeded in October to early November and give winter protection. Both water and wind erosion will be reduced if the ground is covered with a cover crop until next spring. At that time they may be grazed, made into silage, or plowed down to add organic matter. We regard cover crops as being very important to maintain soil fertility and water-holding capacity.

To Establish Conservation Practices

Fall is one of the times to introduce strip-cropping into the farming program. After the row crops are harvested and at the time of seeding winter grain, some slopes may be contoured and planted to winter grain. The clean Streams Law calls attention to good soil conservation practices and some farmers may want to start developing their plans this fall. The local Soil Conservation Service are responsible for assisting land owners to establish more conservation practices.

Letters to the Editor

Dear Friends:

The members of the Berks County 4-H Baby Beef Club invite you to attend their annual sale of top quality 4-H baby beef steers. This year, we expect to have about 35 head of steers which will be sold at the Auction on Wednesday, October 16, 1974, starting at 3:00 p.m. **These steers will be sold at the weight at the time they enter the sale ring.** The buyers will receive a duplicate ribbon as that awarded to the clubmember. Special "table cards" will be available for restaurants or your place of business.

Incidentally, if you have the time, we invite you to be present for the judging of these steers, which will be held on Wednesday morning, October 16th, at 10:00 a.m., prior to the sale.

We hope that you, or one of your representatives, will plan to attend this sale of the Berks County 4-H baby beef steers on Wednesday, October 16, 1974, at 3:00 p.m. at the Leesport Market and Auction, Leesport, Pennsylvania 19533.

Charles E. Suloff

State Grant for Rural Studies Goes to 8 Area Colleges

A $22,000 grant to assist in the formation of a cooperative Rural Studies Program has been awarded by the Pennsylvania Department of Public Education to eight colleges and universities in central Pennsylvania.

The schools, which will be working together on a joint project for the first time, are Bloomsburg State College, Bucknell University, Lock Haven State College, Lycoming College, Mansfield State College, Pennsylvania State University, Susquehanna University, and Williamsport Area Community College.

The program is believed to be the first in the nation in which rural society will be studied by undergraduates from a liberal arts point of view through cooperation among several institutions.

A significant aspect of the program will be off-campus, on-site studies by students, who will meet and work with local leaders of all segments of rural society in the area.

Receipt of the grant was announced by Dr. Gustave W. Weber, president of Susquehanna University and Chairman of the Council of College Presidents for the Central Susquehanna Region. He also stated that George W. Fasic, director of planning and community development for the Institute for Regional Affairs at Bucknell, would serve as coordinator of the program.

The program, which will get underway this fall with the ultimate goal of studying all aspects of rural life, is a pilot venture which will be used to help determine the ability of the eight institutions to work together on similar projects. The program is designed to bring students, faculty members and rural residents together to identify and solve problems peculiar to rural areas.

Describing the need for the program, its sponsors have noted that "more and more, rural society has become the passive, acted-upon segment of American society. Large scale public works are planned and built in or through rural areas whose needs and desires have been taken into account only in the most perfunctory manner.

"Simultaneously, existing rural, political, social and economic institutions increasingly are affected by and respond to decisions and policies arrived at centrally, with little appreciation or regard for local or regional desires or needs."

Sponsors of the program feel, however, that there are outstanding opportunities in this particular geographic area to redirect attention to the development of rural society. Pointing to the region's "unique indigenous academic resources" they are convinced much can be done to assist the region in the development of "its full economic, cultural, and political capabilities according to the desires of the resident population."

The first year of the program will consist primarily of an inventory and assessment of the resources available at the cooperating schools, detailed planning and development of the program, and the preparation of courses. These courses would be offered beginning in the summer of 1975 and 1976 and in the 1976-77 academic year.

In addition to the long-range goal of improving many aspects of rural life, it is hoped that the research and study undertaken by students and faculty involved in the program will result in increased community service and the enhancement of existing resources.

Administration of the program will be under the direction of a board of directors comprised of two representatives for each school. A Rural Studies Advisory Group, composed of faculty, students and representatives from cooperating communities and agencies, will be selected by the Board.

Members of the Board of Directors for the program are James H. Huber, associate professor of sociology, and William L. Jones, assistant dean of the faculty, at Bloomsburg State College; Wendell I. Smith, provost, and Melvyn L. Woodward, director of the Institute of Regional Affairs, at Bucknell University; Arden W. Holland, Professor of education, and Robert D. Lynch, director of development and Upward Bound, at Lock-Haven State College; and Robert L. Glunk, registrar and assistant to the dean, and J.S. McCrary, chairman of the department of sociology and anthropology, at Lycoming College.

Also David Darby, assistant professor of geography and regional planning, and James Y. Glimm, associate professor of English, at Mansfield State College, Donald Crider, assistant professor of rural sociology, and T. Sherman Stanford, assistant to the senior vice president for development and relations, at the Pennsylvania State University; Frank W. Fletcher, director of the Institute For Environmental Studies, and John T. Moore, registrar, at Susquehanna University; and William Homisak, director of community services, and Otto L. Sonder, Jr., professor of sociology, at Williamsport Area Community College.

BERKS COUNTY DHIA MONTHLY REPORT

AUGUST 1974

Roxy, a cow in the herd of Charles D. Moyer, had the highest production record for the month of August in Berks County. She produced 12,889 pounds of milk with 743 pounds of butterfat.

Second high cow recorded was Blond 50 in the herd of Harry W. Naftzinger which produced 21,441 pounds of milk.

High in the herd summary was the herd of John H. Stump with second high honors going to Muddy Creek Farm.

Pequea Presbyterian Church in Salisbury Township will honor its founders with a day of services and fellowship on Oct. 13th.

Rural Church Observes 250th Anniversary

The Pequea Presbyterian Church in Salisbury Township will honor its founders with a day of services and fellowship on Sunday, October 13th.

The Church was established in October 1724 although members of the Presbyterian faith had settled in the area at an earlier date.

Rev. Adam Boyd, the first preacher, also preached throughout a large area of what is now Lancaster County and a part of Chester county. Because of the number of churches he served, he was able to be present at each one every sixth Sunday.

Pequea's log church stood in what is now a part of the Cemetery. A large oak tree which stood near the church remained there until 1971. The log church was removed some time after the first permanent church was built. That church is now a part of the Sunday School wing.

Everyone is invited to attend the October 13th services. Rev. Dr. Wm. Rusch of the Penna. Synod will preach during the 10:30 a.m. service. A period of fellowship and homecoming will follow. Closing vespers are scheduled for 3:15 to 4:00 p.m.

Church relics and antiques will be on display all day.

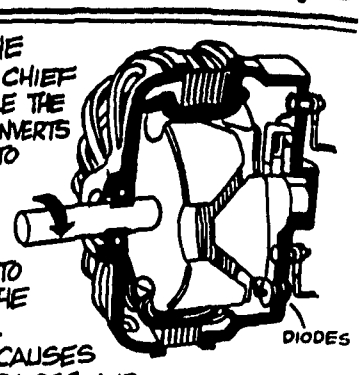
The Pequea Church is located on Cambridge Road near White Horse in Salisbury Township.

Rev. Stanley H. Burns is pastor.

Over $184,100 in scholarships will be awarded 265 national winners during the 53rd National 4-H Congress in Chicago, Dec. 1-5. The awards are provided by corporations, businesses and foundations in some 43 different programs.

Automobile Service Tips

ALTERNATOR—IS THE ELECTRICAL SYSTEM'S CHIEF SOURCE OF POWER WHILE THE ENGINE IS RUNNING. IT CONVERTS MECHANICAL ENERGY INTO ALTERNATING-CURRENT ELECTRICITY WHICH IS CHANNELED THROUGH DIODES THAT ALTER IT TO DIRECT CURRENT FOR THE ELECTRICAL SYSTEM. DIRT OR DETERIORATION CAUSES HARD STARTING, POWER LOSS AND REDUCED FUEL ECONOMY.



GO Zero Concord FROM TEAT TO TANK!

NEW MODEL 70'S
Zero Concord
TWIN-VACUUM PIPELINE
MILKING SYSTEM
-WITH COW MONITOR
It's a combination of a new, revolutionary pipeline milking machine and the ZERO Completely-Automated Vacuum Bulk Milk Cooler.

The ZERO CONCORD is the only system that provides stable milking vacuum at the teat end — in parlor or stanchion barn — with a low or high, short or long, pipeline — and without injecting air into the milker units to move the milk. Only with stable vacuum and no air injection can you hope to reduce leucocyte counts up to 65% — increase milk production as much as 20% — and prevent off-flavor and rancid milk.

The safe, stable vacuum is made possible by a patented, scientific principle . . . TWIN-VACUUM . . . whereby one vacuum milks the cows, and a different vacuum moves the milk through a separate pipeline into the bulk tank. In addition — thanks to ZERO's patented SPATTER-SPRAY Automatic Washer and new, improved, high-capacity, transparent milker unit — you have built-in, "push-button", visible self-cleaning and sanitizing of the entire system — without disassembling. And there are many other advantages.

Seipt Elected President of Dairy Shrine

Donald V. Seipt, Easton, was installed as president of the Dairy Shrine Club at its annual banquet, held in conjunction with the Pennsylvania All-American Dairy Show, running all this week at the Farm Show. It was the 25th anniversary meeting of the international dairy organization. The Northampton County Holstein breeder succeeds Dr. George Trimberger, dairy specialist at Cornell University, Ithaca, N.Y.

The Dairy Shrine Club meets annually to honor outstanding dairymen. Membership now totals more than 5,500. Guest of Honor privileges were afforded Dr. Harry A. Herman, a teacher and researcher in dairy husbandry and a leading proponent of artificial insemination since its inception. Now retired, Dr. Herman is a native of North Carolina.

Two Pennsylvanians were among four men installed posthumously into the Shrine's Hall of Fame with the rank of Pioneer. Joe S. Taylor was head of dairy extension at Pennsylvania State University at the time of his death earlier this year. John R. Valentine, Bryn Mawr, who died more than 50 years ago, was a lawyer and pioneer in the use of registered Ayrshire dairy cattle, maintaining a herd of 200 to supply his suburban Philadelphia dairy early in this century.

The other Pioneers recognized both died last year after lengthy dairy industry careers. O.F. Foster was operator of the famed Lakefield Dairy Farm in Clarkston, Michigan, and Dr. James F. Kendrick, Arlington, Virginia, is generally recognized as the father of the Dairy Herd Improvement Association (DHIA) and is also credited with introducing electronic data processing to dairy production.

Lee Housley, Riceville, Tennessee, who earlier in the day served as judge for the Pennsylvania All-American Guernsey Show, was honored as the second recipient of the Dairy Shrine Club's Breeders' Award. Housley maintained a herd of more than 550 Guernseys on over a thousand acres and bred "Housley J. Champion," the leading sire in the Guernsey breed over the past five years.

Tammen President of Plant Society

Dr. James F. Tammen, professor and head of the Department of Plant Pathology at The Pennsylvania State University, was named president of the American Phytopathological Society during its 66th annual meeting recently in Vancouver, British Columbia. He served as president-elect in 1973-74.

The society has over 2700 members throughout the world. Its purpose is to promote the increase and diffusion of all aspects of knowledge relating to plant diseases and their control. At the 1975 meeting, to be held in Houston, Texas, concern will be expressed for the role of plant disease epidemics in potential world famine.

In recent years Dr. Tammen served the society through four terms as councelor and councelor-at-large. He is also a member of the American Institute of Biological Sciences. His honor societies are Sigma Xi, Gamma Sigma Delta, and Phi Epsilon Phi.

Dr. Tammen became head of the Department of Plant Pathology in 1965. Since that time the faculty has grown from 12 to 29, graduate student enrollment from 12 to 36, and department personnel from about 40 to 100.

Under his leadership the faculty instituted new undergraduate and graduate programs. Research and Extension programs have been strengthened with emphasis on studies of plant disease management.

The National 4-H Service Committee, as its name implies, truly is a committee. The roster of officers, directors and members include public spirited leaders of business, agriculture and education.

Pumpkin Growing Contest

The fourth annual Twin Valley Future Farmers Pumpkin Growing Contest will be held on Friday evening October 11, 1974 in the Twin Valley High School cafeteria and auditorium. The contest is open to all students in the four elementary schools of the Twin Valley District. Last spring FFA members distributed over 1000 packets of seed to interested students along with copies of the rules and instructions for growing the pumpkins.

Those elementary students who have pumpkins for the contest should bring them to the cafeteria between 7:00 and 7:30 p.m. Each student is allowed to enter three pumpkins, but all must be from seed distributed by the FFA. Students should attach a card to their pumpkins giving their name, age, grade, school, and teacher's name.

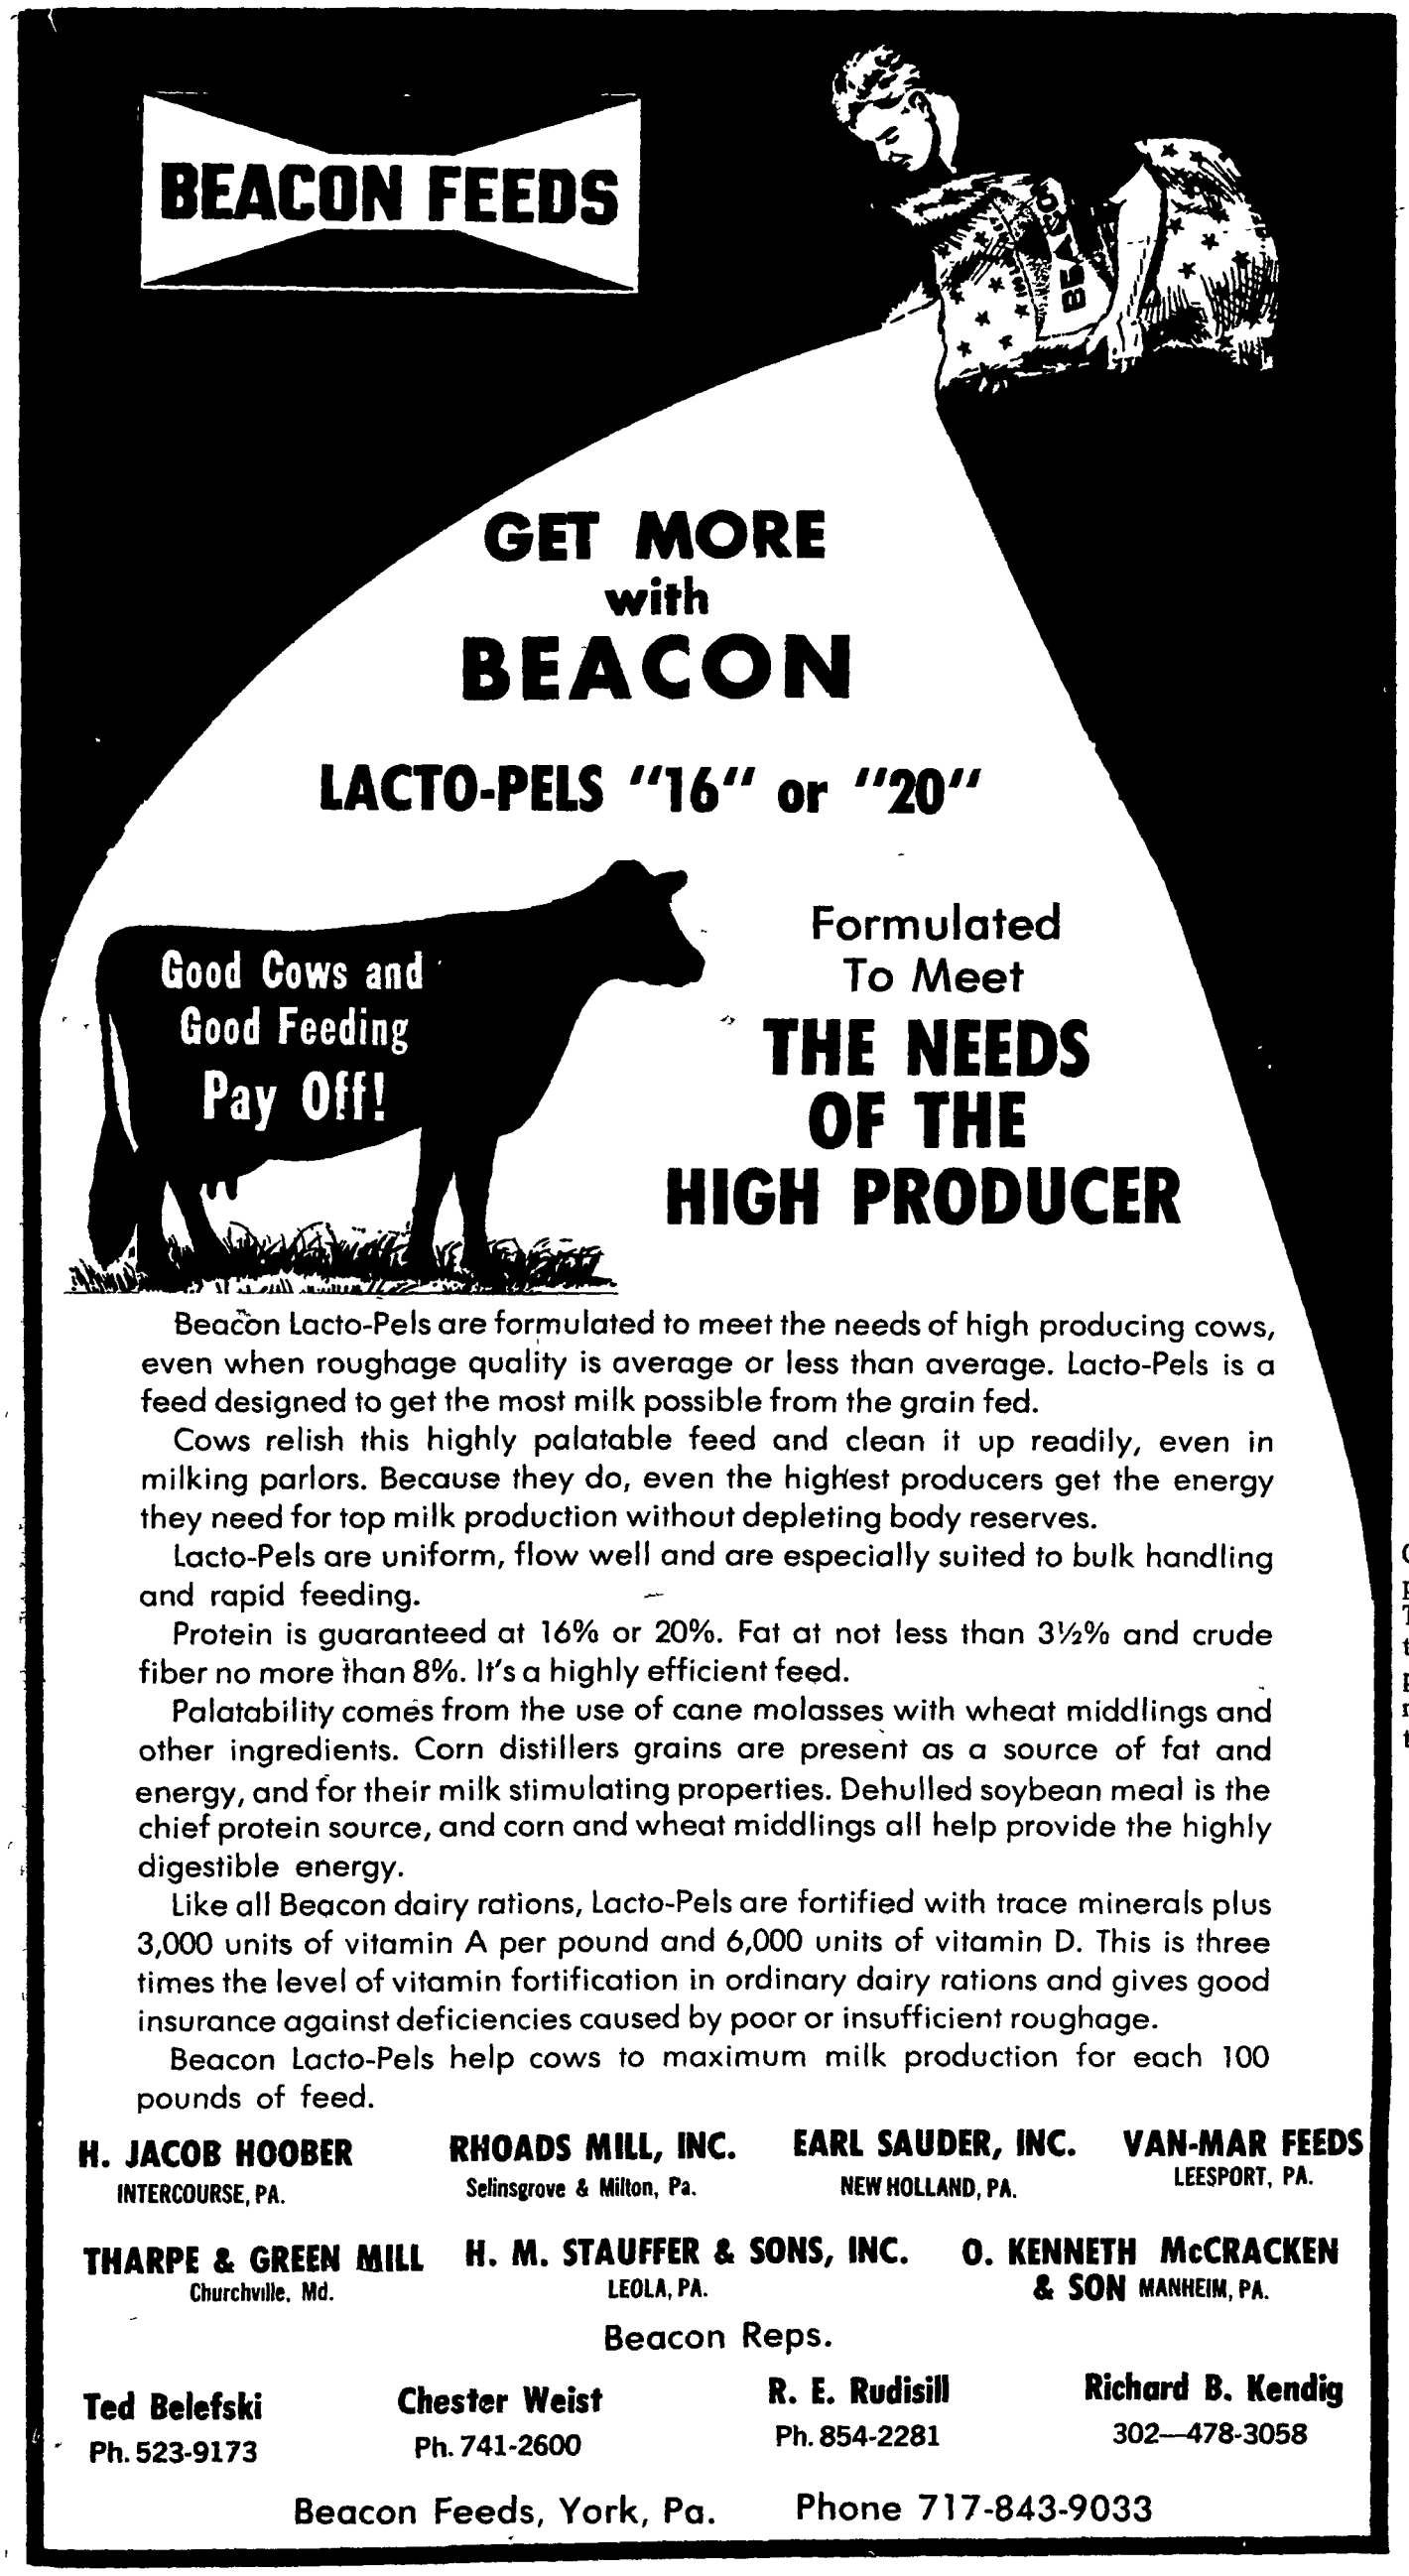
While FFA members are weighing and measuring the pumpkins, a member of the high school faculty will judge the most unusual shaped pumpkin category. From 7:30 until 9:00 p.m. the film "The Absent Minded Professor" will be shown in the auditorium for the entertainment of the contestants and their parents. About 9:00 p.m. the winners will be announced and prizes will be distributed. Prize winners in each of the three categories - heaviest pumpkin, pumpkin with the largest circumference, and most unusual shaped pumpkin - will receive monetary prizes and will compete for grand champion trophies in each category. Over $160.00 in prize money will be distributed.

This year for the second time, there will be a teachers division in the contest. Teachers will compete for a trophy for the heaviest pumpkin.

Last year's winners were: Larry Barnet, heaviest pumpkin; Rodney Stoltzfus, pumpkin with the largest circumference; and Sandie Ritchie, most unusual shaped pumpkin. Winner in the teachers division was Mrs. Devin.

Refrigerator Noise

If your refrigerator's sound is abnormal, see if there's anything vibrating on top of the appliance. You may have to find a new place for the cookie jar or the car keys if they're causing the troubles



Beacon Lacto-Pels are formulated to meet the needs of high producing cows, even when roughage quality is average or less than average. Lacto-Pels is a feed designed to get the most milk possible from the grain fed.

Cows relish this highly palatable feed and clean it up readily, even in milking parlors. Because they do, even the highest producers get the energy they need for top milk production without depleting body reserves.

Lacto-Pels are uniform, flow well and are especially suited to bulk handling and rapid feeding.

Protein is guaranteed at 16% or 20%. Fat at not less than 3½% and crude fiber no more than 8%. It's a highly efficient feed.

Palatability comes from the use of cane molasses with wheat middlings and other ingredients. Corn distillers grains are present as a source of fat and energy, and for their milk stimulating properties. Dehulled soybean meal is the chief protein source, and corn and wheat middlings all help provide the highly digestible energy.

Like all Beacon dairy rations, Lacto-Pels are fortified with trace minerals plus 3,000 units of vitamin A per pound and 6,000 units of vitamin D. This is three times the level of vitamin fortification in ordinary dairy rations and gives good insurance against deficiencies caused by poor or insufficient roughage.

Beacon Lacto-Pels help cows to maximum milk production for each 100 pounds of feed.

4-Hers from Lancaster County have been busy this fall planning a flower bed for the Lancaster Central Park. Actual planting of the bed will take place next week with Vincent Hoover, park superintendent, to be present. Lancaster County officers who were instrumental in beginning the project include from left: Christine Erb, RD1, Mt. Joy; Karen Greider, RD2, Conestoga and Joseph Lefever, RD4, Manheim.

Used Clothes Can Be A Good Buy

Used clothes can be a good buy, if you can use them as they are, remodel slightly or use the fabric to make something else. Mrs. Ruth Ann Wilson, Extension clothing and textiles specialist at The Pennsylvania State University, points out that in some areas of the state there are small shops specializing in handling used clothing. People who have clothing they no longer need can leave it at the store. The store will then try to sell the articles and the former owner receives a portion of the sale price.

In addition, there are other kinds of used clothing stores, many of which are run by charitable organizations. If you're buying used clothing, look at specific aspects of the garments before you buy for use as is, cautions Mrs. Wilson.

The fabric should be holding up will at points of wear, such as the knees, elbows, and the seat. The stitching on the fabric should be strong. And for children's clothes to stay together, stitching should be small and firm. Elastic needs to have good stretch. Zippers need to be in good working order. Buttonholes shouldn't be raveling and buttons should be attached.

The style of the garment should not be so out-of-date that you or a child will feel uncomfortable wearing it But with a little imagination, the Extension specialist says you can make some outdated styles into attractive outfits If the fabric in the garment is to be used to make something new, check to see that the fabric is in good condition. And check the garment to see if it has few enough seams for laying out pattern pieces.

FREY FREE STALL
LIFETIME FREE STALL HOUSING

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6". Size 'em by breed

Our free stall partition may be mounted on wooden head boards or we make a steel divider Set the legs in 8 to 10" concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

- 8 Models all steel welded farm and feedlot gates
- 2 Models all steel welded head catch gate

Mike Grube -

(Continued From Page 1)

Mike has also shown his market hogs at the Ephrata and Manheim fairs bringing home numerous prizes. Last year he had the reserve champion market hog at the Ephrata Fair and has also had the reserve champion hog at the Manheim Fair.

For the past five years, Mike has either had the reserve grand champion or the grand champion hog in the county 4-H and FFA contests, which says much for this ability in selecting animals.

As a first year exhibitor at the Eastern National Show in Timonium, Md., Mike had the grand champion barrow in the junior class that went on to be the grand champion overall at the show in April of this year.

One of the most important awards that Mike has won however has been the James V. Martin Swine Achievement Award. Mike was particulary proud of the award since it represented achievement in the field of swine production and work.

Mike decided that he wanted to keep working in the area of swine management after he graduated from Warwick High School in 1973. Since that time he has worked on a ranch in Nebraska and is now a herdsman for Mark Nestleroth.

Mike isn't sure just what he will do in the future but he expressed an interest in continuing to do farm related work.

When asked what helped him decide on a career he responded by saying that 4-H work and his FFA activities had meant a lot to him.

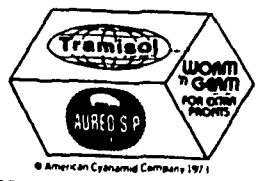
"I appreciate so much what I learned in 4-H and FFA work," Mike explained.

"At the time it seemed like it was too much practicing for the judging team and the activities but it has paid off."

Mike was busy this past week for once again he was exhibiting his hogs at the Ephrata fair and his judgement in livestock paid off as he took home the grand champion hog prize.

Mike Grube displays some of the trophies he has won for livestock judging and market hogs.

Stevens Feed Mill, Inc.
offers hog farmers in Lancaster county a new program to help keep your hogs "insides clean"



*Knock out worms with TRAMISOL, the wormer that gets the four major species of worms in the intestines, and lungs.

*Maintain healthy hogs with feeds containing AUREO S·P 250. Improves weight gains and feed efficiency by helping to prevent scours, rhinitis and cervical abscesses.

This year help keep your hogs "inside clean" with TRAMISOL and AUREO S·P 250.

Lampeter

(Continued From Page 1)

son of Mr. and Mrs. Thomas Harnish, Strasburg.

The reserve champion FFA steer, a Hereford, was shown by Jay Shertzer, Conestoga RD2. His 995-pound steer was bought by Kunzler, Inc., Lancaster, for 65-cents a pound.

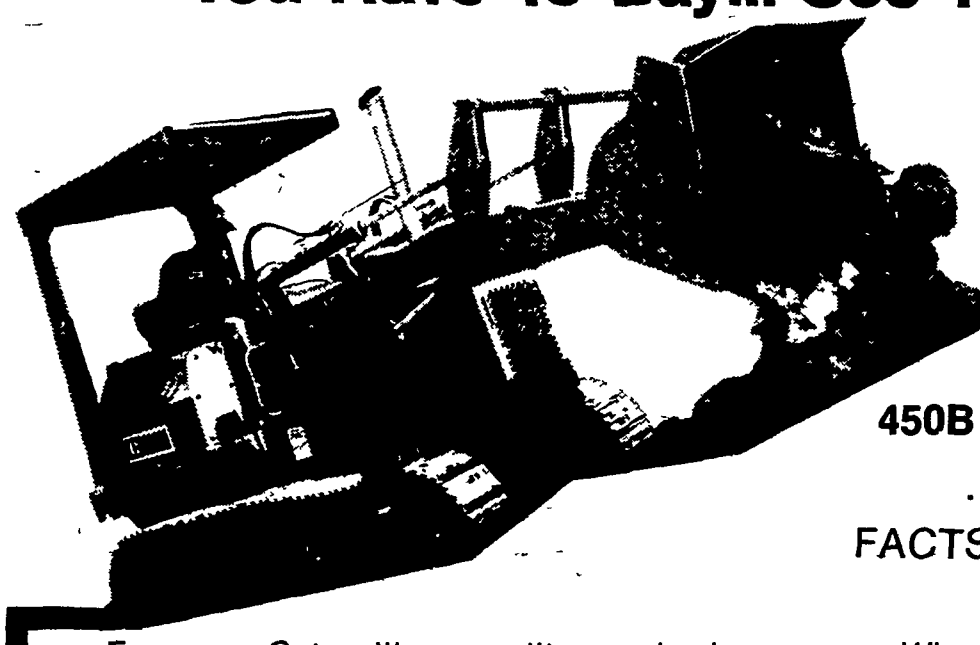
Kunzler also purchased the grand champion market hog, a 220-lb. Duroc shown by Robert Hess, son of Mr. and Mrs. Gerald Hess, Lancaster RD2. Hess received $2.10 a pound for his animal.

The champion pen of four hogs was raised by Doug Rohrer, son of Mr. and Mrs. Harold Rohrer, Lampeter. The First National Bank of Strasburg bought the four pigs for 56-cents a pound.

The average price paid for the other steers was 51-cents a pound, while the average for the hogs was 43-cents.

Buyers at this year's sale were: Willow Valley Farms, Willow Street; Kunzler, Inc., Lancaster; First National Bank of Strasburg; New Holland Sales Stable, New Holland; Kings IGA; F&S Meats, Strasburg; John J. Hoober, Gordonville; Lewis Lyons & Sons, Lancaster Stock Yards; J. Mowery Frey, Jr., Lancaster; and Henry Groff, Leola.

Before You Buy That Track-Type Loader You Think You Have To Buy... See The Caterpillar 931 Loader



IF YOU OWN A **JOHN DEERE 450B** . . . an **IH TD7** . . . or a **CASE 450** . . . YOU SHOULD KNOW THESE FACTS ABOUT THE **CAT 931 LOADER**

Famous Caterpillar quality and dependability are evident in every detail on the 931. So, when buying or trading, you can have the confidence that comes with a CAT built machine **at a price you can afford.**

The CAT 931 Loader is versatile. You can match it to your work needs with a General Purpose Bucket, a Multi-Purpose Bucket, a Ripper or a Backhoe. Whatever application you need in a small trackloader.

We want to talk to people who thought they **could not buy** Caterpillar built machines. We want to talk to people who **never thought** of buying Caterpillar built machines. If you have a need for a small trackloader in your work, the CAT 931 Loader is the one piece of equipment to fill that need.

When you combine the features and performance of the CAT 931 Trackloader with the skilled maintenance and parts availability you can count on from Cleveland Brothers, you've got a total package that's hard to equal. And if you consider financing a problem, give us a call. We can tailor financing to fit your needs.

Don't buy that machine you thought you had to buy. Come in and see us first. We think we'll change your mind.

To find out more about the CAT 931 Loader, call us in Harrisburg (717) 564-2121, or fill in and return this coupon.

This camphor ball doll is practical as well as novel. Cut out Pattern No 1068 makes doll, about 10 inches, with arms and legs stuffed with camphor balls to be used in the clothes closet

Send 50¢ for each dress pattern, 30¢ for each needlework pattern (add 15¢ for each dress pattern, 10¢ for each needlework pattern for mailing and handling) to AUDREY LANE BUREAU, Morris Plains, New Jersey 07950

Gordon Hoover, Gap RD1, seated, nd David B. Martin, Ephrata RD2, were grand and reserve grand hampion drivers in the Lancaster-Chester FFA tractor driving contest which began with a written exam last Saturday at the Ephrata Fair, and finished up with the driving competition on Thursday at the New Holland Fair. Conditions were too wet and muddy on Saturday to complete the contest.

Tom Ruoss, Ephrata RD2, repeated his feat of last year by capturing grand champion hog honors at the New Holland Community Fair on Thursday afternoon. The 13-year-old Conestoga Valley Jr. High freshman also copped top prize in the showmanship contest.

Poultry Production Increased

Pennsylvania poultry roducers have increased heir weekly production, hich is counter to the ational trend, according to he Crop Reporting Service.

For the week ending Sept. 1, placements of broiler hicks in the Commonwealth vere 1,264,000. This epresents a six percent ncrease above the orresponding week a year arlier, but one percent elow the previous week.

Average placements in ennsylvania during the ast ten weeks were three ercent above a year earlier.

Broiler placements in the 21 key poultry producing states were 49,116,000. This is four percent below the previous week and seven percent below the same week a year earlier.

Average placements in the 21 states during the past ten weeks were eight percent below a year ago.

Some say that steel tempered in forget-me-not juice will become so strong it can cut stone without being dulled.

Winners Named

(Continued From Page 1)

sold for between 50 and 70 cents a pound, quite a contrast to the cattle auction which preceded the 4-H sale where the top price was 46.50 cents a pound.

Mike Martin also placed first in the showmanship contest, finishing ahead of Cindy Yoder, Morgantown, who came in second. And in fitting, Mike took second prize, coming in second behind his sister Kathy.

Placings in the three breeds were:

Hereford

Linda High, 2490 Creek Hill Road, first; Kathy Martin, New Holland R1, second; Tim Groff, New Holland R1, third; Gerald Eberly, East Earl R2, fourth; Dale Hershey, Ronks R1, fifth.

Crossbred

Mike Martin, New Holland R1, first; Jeff Martin, New Holland R1, second; Cindy Yoder, Morgantown, third; Donna Eberly, East Earl R2, fourth; Gordon Hoover, Gap R1, fifth.

Angus

Tami Groff, New Holland R1, first; Tony Weaver, Gap R1, second; Audrey Hoover, Gap R1, third; Glenn Yoder, Morgantown, fourth; Donald Bowman, Ronks R1, fifth.

Judge for the baby beef show was Donald Nichols, beef cattle herdsman at Penn State. Nichols also judged the hog show which followed.

Hog Winners

Tom Ruoss, the 12-year-old son of Mr. and Mrs. W. Frank Ruoss, is following in the footsteps of his older brother, now in the Air Force, who took the grand champion ribbon in the New Holland hog show for three years in a row. Tom has a good seven years of competition left, and is hoping to equal or improve on his brother's record.

Tom's grand champion of the show was a Duroc. His father is a Duroc breeder.

The seventh-grader at Conestoga Valley Junior High School also won the showmanship award.

The reserve champion market hog a crossbred, was shown by Susie Martin, New Holland R2. She also placed first in the fitting contest.

Third place in the show went to her sister, Jeanie Martin, who also exhibited a crossbred. Esta Lapp, Kinzer R1, showed the fourth place hog while Mike McCauley, Kinzer R1, showed the fifth place hog.

The hogs were scheduled to be auctioned off at 2:00 p.m. on Friday.

Hoover Wins Tractor Driving

Two Lancaster County teenagers took the top two placings in the area Future Farmers of America tractor driving competition between Lancaster and Chester counties yesterday.

Gordon Hoover, 17, son of Mr. and Mrs. Raymond M. Hoover, Gap R1, took the grand champion trophy while David Martin, 15-year-old son of Mr. and Mrs. Raymond Martin, Ephrata R2, took the reserve grand champion honors.

The event was scheduled to be held last Saturday at the Ephrata Fair but after rain soaked the course, the event was moved to New Holland yesterday afternoon.

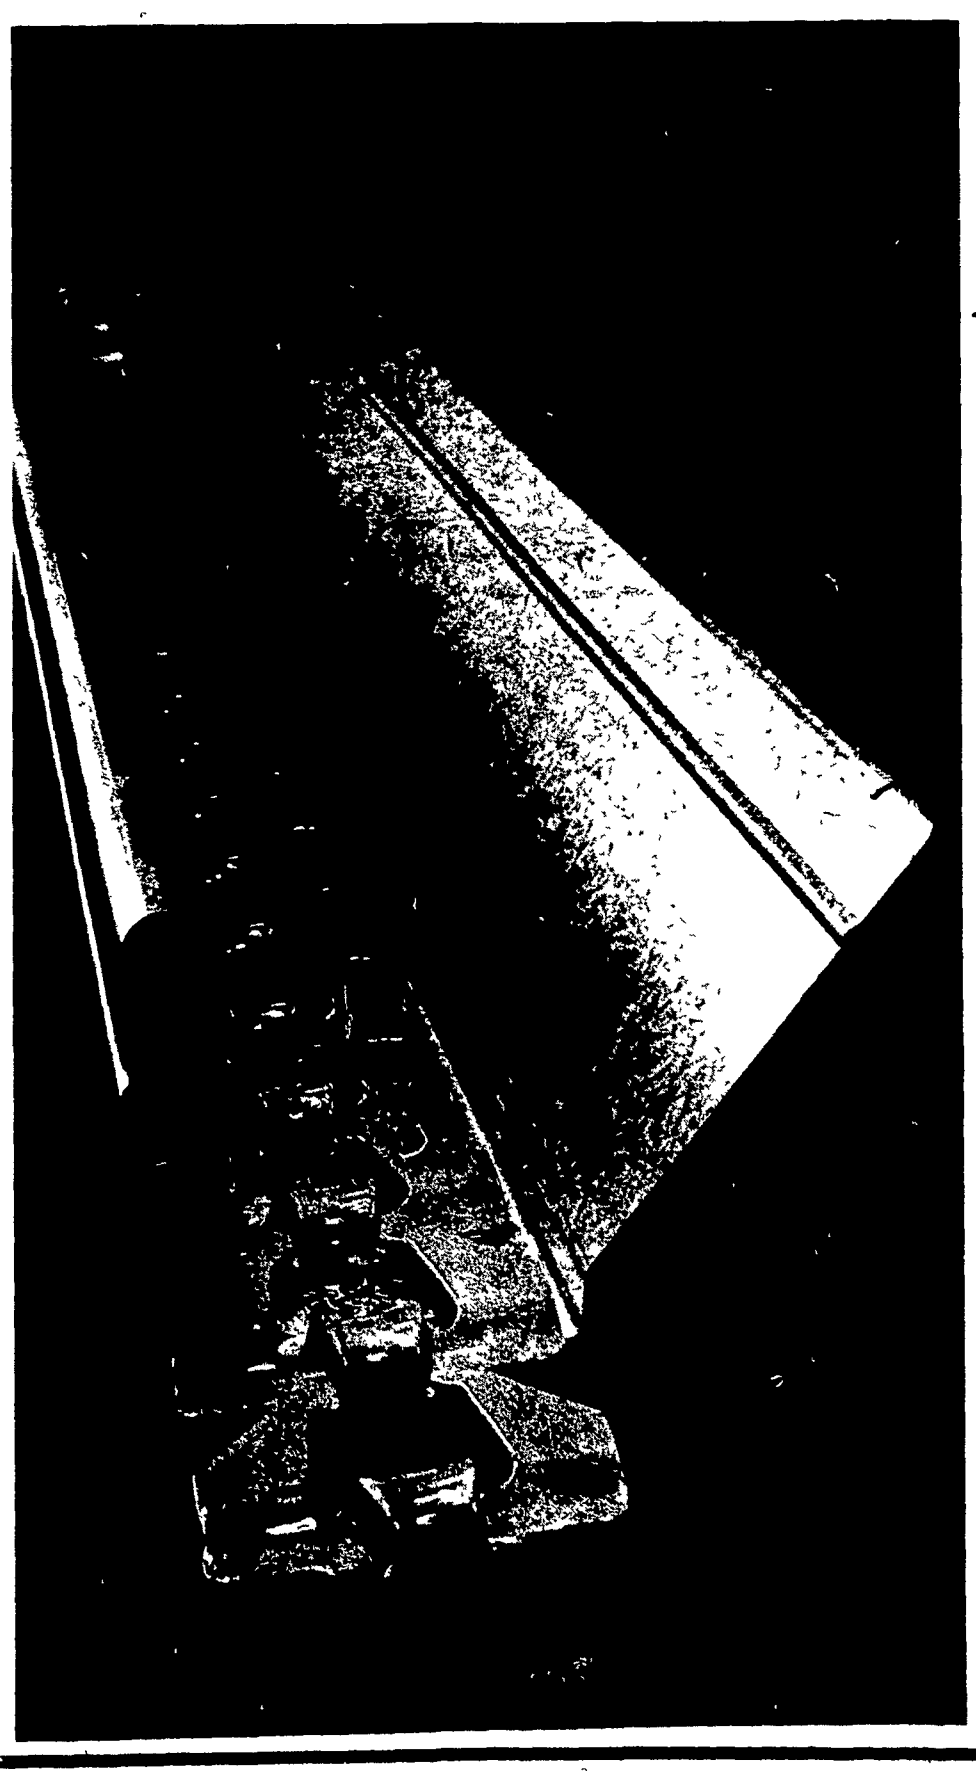
Each participating chapter in both counties entered one member in the contest which included both a written examination on tractor driving and safety and the actual driving competition held yesterday.

In the driving competition, the FFA members drove a tractor towing a manure spreader through a course and then had to back the vehicle into a just slightly larger stall.

They also had to pull a wagon out of one stall and into a just-slightly-larger stall.

Paul Smucker, left, owner of the Bird-in-Hand Motor Inn, paid $1.14 per pound for this grand champion crossbred steer shown Thursday at the New Holland Fair by Mike Martin, New Holland RD2.

From the Beginning



chain feeding has been a chain of improvements

Our Chain Feeders have been performing for thousands of successful poultrymen for over 25 years.

Today when you buy Big Dutchman chain feeding, you get "Speed Feed," a systems concept that is so good, nobody has been able to duplicate its performance. That's because we've been working on chain feeding since the beginning.

Big Dutchman, where proven ideas are put into action.

Harvest Frosted Beans Quickly

Lancaster County agricultural agent Max Smith Friday urged farmers with double-cropped soybeans out in the field to get them into the silo as soon as possible. "Beans that were planted in May should have been mature enough before the frost hit to dry down enough for normal harvest. Those farmers who double-cropped beans after barley, though, may find themselves with a immature beans that will never dry down to the proper 12 to 15 percent moisture stage. These can be made into silage, but they should be gotten out of the field just as soon as possible."

Smith said there might be several hundred acres of soybeans in Lancaster County that were double-cropped after barley, going in sometime after June 1. These are the beans most likely to be frost damaged, and they should be put into the silo this week.

American Viewpoints

We cross the prairie as of old the Pilgrims crossed the sea, to make the West, as they the East, the homestead of the free!

—John Greenlief Whittier

Dairymen Urged To Watch Costs

(Continued From Page 1)

money. "There's just not much excuse right now for feeding young calves anything but sour colustrum," he noted. Young stock should also be provided with forage from the first week on, Adams feels, and it can be silge, haylage or greenchop.

Adams scored the Lancaster County audience, telling them they were the most extravagant farmers "on the face of the earth". He said, "If dairymen would watch their spending, they'd be doing themselves more good than if they got a $3 increase in the price of milk. Especially here in this county. You spend too much on silos, silage additives, mineral mixes, special feed additives and forage testing and feed testing programs that are more elaborate than Penn State's but don't give you any more useful information.

"I'm not saying you don't need any of these things. But I am saying that there are all kinds of these things available, and if you buy something, you'd just better be sure that you do need it, and that you're getting it at the best price available."

Going through some computations, Adams explained the importance of the milk to feed price ratio, and showed how it has changed in a relatively short time. "About 18 months ago, the feed to milk ration left you feed a pound of grain for every two-and-a-half pounds of milk production. Today, you shouldn't be feeding more than one pound of grain to every five pounds of milk."

Adams cautioned against switching the feeding program too fast, urging the dairymen to make sure their cows got some forage, and a protein feed that should be about four percent higher than they've been using. He also recommended feeding one pound of grain for every three pounds of milk in the first five months of lactation, then cutting back to one to six in the latter stages of production.

"I'm not saying you'll be getting as muck milk as before," Adams commented, "because if you do you were really messing up before. But you will decrease your costs and you will increase your returns from milk. I know one farm where they've saved 42-cents a day on every cow in the herd."

Meet Lancaster County's new poultry princess, Michele Renee Melhorn, 17-year-old daughter of Mr. and Mrs. John W. Melhorn, who own a hatchery in Mount Joy. Michele is a senior at Donegal High School, where she plays hockey, is on the gym team and a member of the band. Other activities include football team manager, booster club, Future Business Leaders of America, and the drama club. Michele hopes to attend Hagerstown Legal Secretarial School after she graduates from high school, and she eventually hopes to be a court reporter.

Machinery Safety Facts

HARVEST-TIME AND MACHINERY SAFETY

"I'm so busy I don't have time to get sick!" Have you ever heard someone make that statement? Harvest-time is one of those times that illness or injury due to an accident would be the last straw. Bad weather, equipment breakdowns, hired help that fails to show when you need them, a sick cow, a repair part that was supposed to arrive day before yesterday, . . . - just one problem after another. And there's just no time (or money) available for an accident. Yet history shows that harvest time is when many accidents occur. These accidents are usually serious, costly and time consuming. Also, most are preventable, if you know how to be careful and use common sense.

People and Farm Machinery Accidents

Human errors are responsible for most accidents. Even most of those that are blamed on mechanical failure could have been prevented if someone had checked and repaired the equipment as the need arose. To err may be human, but it can also be deadly. The following suggestions will eliminate many of the human problems associated with accidents.

Permit only the operator on equipment while it is in use. Keep small children out of work areas unless accompanied by a responsible adult who can give them undivided attention. Give teen-agers work which they can handle safely. (Recognize such factors as sense of responsibility, experience, strength and ability to concentrate.) Make certain that operators of all machines, including trucks, are qualified - physically and mentally and when appropriate legally. Give extra supervision and instruction to inexperienced operators. Avoid excessive fatigue - take mid-morning and mid-afternoon breaks. Keep your mind on what you are doing.

Mechanical Care of Equipment

Don't assume that equipment is safe merely because no accidents have occurred. Check equipment and eliminate hazards promptly. If you don't they may eliminate you!

Keep all shields and guards in place. Service equipment according to manufacturer's instructions. Replace worn parts. Disengage the power when making repairs or adjusting the machinery. Never put on or remove a belt or chain while the pulley or gear is in motion. Maintain the proper adjustment of slip clutches. Do not jack up the machinery for repairs unless you use a jack stand to provide support if the jack fails. Do not allow grease or oil to accumulate anywhere on the machinery where you may have to climb while getting on or off or while servicing the machine. Use metal sediment bowls to reduce fire hazards. Watch for leaks. Keep exhaust systems in good condition to reduce fire hazard.

Operational Safeguards

Use special caution when working near exposed moving parts. Reduce tipping hazards. Spread the rear tractor wheels. Insist upon a sturdy, comfortable seat on tractors and self-propelled equipment. Adjust it to suit the operator. Put all controls in neutral before turning on the ignition key. Remember that speeding is dangerous and hard on equipment. Use special caution and slow speed when making turns or abnormal maneuvers especially on slopes, near ditches, gullies or fences. Do not turn too short. Keep proper fire extinguishers on hand and ready for use; check them at regular intervals and know how to use them. Be especially careful of footing while mounting and dismounting. Do not dismount until equipment has come to a complete stop. Keep keys out of the ignition while tractors and self-propelled equipment are not in use to prevent children from accidentally starting them. Also set brakes and disengage PTO.

Highway Precautions

When collisions involving farm equipment and other vehicles occur the person on the farm equipment is usually the victim.

Use proper warning devices, such as the Slow Moving Vehicle (SMV) Emblem as required by law. Pull off the road whenever possible to allow traffic to pass. Try to avoid heavily traveled roads when moving the equipment. Do not move equipment after dark unless really necessary. Make sure brakes are evenly adjusted. Install and use rear-view mirror. Obey traffic rules. Use hand or turn signals.

Other Safety Suggestions

Wear rather close-fitting clothing. Loose clothing is more apt to get caught in machinery. A person who is extremely hot or cold is more likely to have an accident. Provide shade from hot sun, heated cab in cold weather; wear clothing to match the weather. Know approved first aid practices and carry first aid kits on farm equipment - just in case. Practice safety, set safety examples and speak up for safety.

FFA Alumni Set National Meeting

The National FFA Alumni Association will hold its National Meeting October 17 and 18, 1974. The Meeting will be held in conjunction with the National FFA Convention in Kansas City, Missouri. The Alumni Meeting will be in the Muehlebach Hotel on Thursday and Friday mornings, October 17 & 18, at 8:00 A.M. and 8:30 A.M. respectively.

Presiding over the Meeting will be this year's National FFA President Alumni Chairman, Mr. Gus R. Douglass, a former National FFA President and current Commissioner of Agriculture in West Virginia.

The first presentation of the "FFA Alumni Outstanding Achievement Awards" will be made. This award will be presented annually to former FFA members for outstanding accomplishments, achievements, and exemplary service to agriculture.

Featured speaker for the Meeting is Mr. Orion Samuelson of WGN Chicago.

The FFA Alumni Association is made up of former members of the Future Farmers of America. It's devoted to assisting the FFA, promoting a greater knowledge of the agricultural industry, and supporting education in agriculture.

All former members of the FFA are invited to attend the Meeting and join in the FFA Alumni movement. For more information, write: FFA Alumni Association, P. O. Box 15058, Alexandria, Virginia 22309.

The National 4-H Service Committee, Chicago, provides program services, information services, publishes *National 4-H News* magazine and operates a supply service offering some 1450 4-H emblemized items.

LEAST COST PERFORMANCE WITH PURINA LIFE CYCLE TEMP-R-RATED LAYING CHOWS

When you feed your layers Purina, you feed a ration that is adjusted to temperatures . . . to get total performance from your birds.

Purina Poultry Research knows how a hen's nutrient needs change as temperature changes So, they've formulated fortified Temp-R-Rated® Laying Chows® . . . built to meet bird nutrient needs to help hens produce at the top of their ability.

These rations, made with high quality ingredients, are balanced for low, mild, warm and high in-house temperatures Feeding the right ration at the right time can help hens produce each dozen of eggs on a minimum of feed.

Come in or call us . . . for more information on Purina Temp-R-Rated Laying Chows for your birds Let us help you get more eggs during all seasons of the year with the right ration

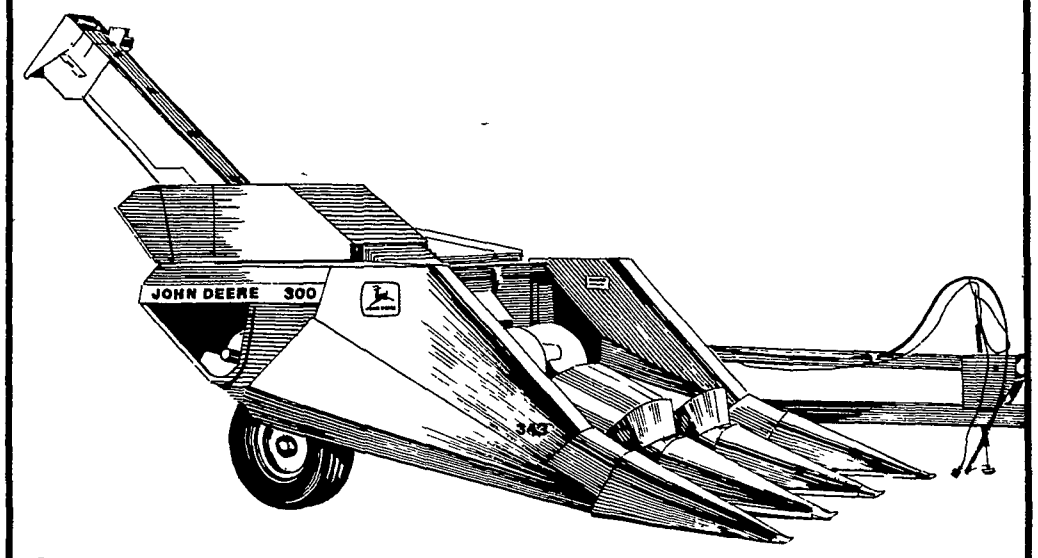
Unique air system provides outstanding husking capacity with a John Deere 300 Husker



Give the John Deere 300 Husker a close look Its unique air system features two powerful air blasts. You get a 2,400-cubic-foot-per-minute airstream through the first elevator and a 3,400-cfm blast above the husking bed. Both air blasts remove some husks, loosen others, and blow trash away from the husking bed. Then the husking rolls can perform at peak efficiency, removing the few husks which remain attached to the ears. That's why a John Deere 300 Husker can pick and husk up to three narrow rows at high speed. Be sure to ask about new high-flotation tires too. See the high-capacity, efficient 300 Husker soon.

Brucellosis - Care Is Still The Watchword

Not only is brucellosis still with us but the number of infected cattle herds is increasing, according to Dr. Paul Becton, director of the National Brucellosis Eradication Program for the U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS). Some increases are in areas considered relatively free of infection, so there's ample reason for taking precautions wherever you are.

"You should make every effort to learn the brucellosis status of the herds from which replacement animals originate," says Dr. Becton, "and buy only from herds known to be clean! When buying replacements for your breeding herds, you should also insist that they be tested and found free of disease before allowing them to come onto your farm."

Dr. Becton cautions, however, a single negative test is no guarantee of freedom from brucellosis, because the disease has a long and variable incubation period. "Some animals exposed to brucellosis may show no reaction to a blood test one day, only to react to a test 30 to 60 days later," he observes.

The veterinarian recommends isolating new replacements from the established breeding herd and testing them again 30 to 60 days after purchase. Young females for feeding should also be retested or else they should remain isolated from the breeding herd as long as they're on the farm or ranch.

What about vaccinating animals for brucellosis? "No vaccine is perfect," notes Dr. Becton, "and Strain 19 is no exception. Under usual field conditions, it's quite serviceable - protecting about 65 percent of the animals vaccinated. This percentage can be drastically reduced, however, under conditions of massive exposure."

"I feel every dairyman must weigh the advantages of vaccination in his own herd, with an eye toward future plans as well as present conditions. Is he maintaining essentially a 'closed herd' or does he buy and sell frequently? Does the farm border a strictly commerical herd that purchases additions for various parts of the country? Also, does he produce animals that are sold as replacements to high risk areas or states that require vaccination?

"Should a dairyman decide to pusue a vaccination program, heifers should be vaccinated as soon as possible after three months of age - preferably in the three to six months age range. This will provide adequate protection and will almost completely eliminate the problem of vaccine interference with blood tests."

Such interference has been a serious problem in the past - for herd owners, their veterinarians and regulatory people. This happens because vaccine produces the same antibody in the blood as the one produced by actual infection. So when the animals are later blood-tested, it may not be possible to distinguish between reaction caused by true infection and reaction caused by the vaccine. This problem is most common in animals vaccinated after six months of age.

Many cattlemen know brucellosis as Bangs or contagious abortion. It's a chronic bacterial disease which persists for long periods in infected animals. When brucellosis gains entry into a herd of susceptible females, large numbers of abortions often result. The calf crop may be reduced by 15 to 40 percent. Milk production in infected dairy herds may be reduced by as much as 20 percent.

Infected cows shed germs of the disease when aborting . . . germs which are likely to be picked up by other cows. A cow that aborts due to brucellosis may later give birth to normal calves but still shed the germs whenever she gives birth. Also, about one out of five cows will not rebreed after an abortion caused by brucellosis.

Dr. Becton says one thing farmers can do to control the disease is to consult a veterinarian whenever a cow has an abortion or still birth, to find if brucellosis is the cause.

Besides infecting cattle and other livestock, brucellosis was once a significant human health problem. In humans, the disease is called undulant fever and causes persistant symptoms somewhat resembling influenza.

As a result of efforts to eradicate brucellosis from livestock, the incidence in humans has been dramatically reduced. Presently, nearly all cases are occupation-associated - with farmers, veterinarians and packing plant workers being among the hardest hit due to their coming into direct contact with infected animals.

"You should take the

Brucellosis

(Continued from Page 22)

precaution of cleaning any areas on the farm likely to become contaminated, and keep them "clean," advises Dr. Becton. Wear gloves when assistang an animal during calving or one that aborts, and scrub well afterward. Also, avoid drinking raw unpasteurized milk or eating any of its by-products.

Beginning with the accelerated eradication program, made possible by additional funding by Congress in 1954, the national program to wipe out brucellosis made steady progress until 1971. Since then the trend has reversed.

Some of this increase may be attributed to greater efficiency in finding infection, but there has been an increase . . . substantial enough to cause alarm. Livestock industry leaders, as well as state and federal animal health officials, voiced concern. In December 1973, a national meeting was called in Washington, followed in early 1974 by a series of regional meetings in six other cities.

From the meetings came a renewed commitment by government and industry to see the job through. Industry representatives called for certain practical adjustments in the program. But virtually all remained solidly behind the goal to eradicate brucellosis and opposed to a mere control effort.

Despite increases of brucellosis, the livestock and dairy industry has realized great savings from the cooperative 'state-federal eradication campaign. Losses from lowered milk production, aborted calves and pigs, and reduced breeding efficiency have decreased to about $20 million annually. Such losses today would amount to an estimated $400 million annually without the eradication program.

Today's program is based on detection of the disease through surveillance measures, investigations of infected herds, elimination of infected animals by slaughter, and vaccination of replacement calves to increase their resistance.

In response to the need for continuous and inexpensive screening of dairy herds, the brucellosis ring test (BRT) was developed for national use in 1952. Subsequently, the procedure called market cattle identification (MCI) was developed for screening beef herds. This involves testing of blood samples from identified cattle going to salughter or at first point of concentration. Some states require testing of all cattle upon change of ownership.

Testing cattle when sold at the market is, by far, the most effective means of screening beef herds. This greatly improves trace-back efficiency and aids control over negative exposed cattle in market channels.

Specifically, this type of surveillance requires that all eligible cattle - whether sold to slaughter or to a farm as breeding stock - be blood tested for brucellosis at the first assembly or marketing point after leaving the farm or origin. Eligible cattle includes all cattle, except steers and spayed heifers, that are 24 months of age or older and any younger females showing evidence of pregnancy, or of having aborted or calved normally.

So far, Arkansas, Georgia, Louisiana, and Tennessee have initiated first-point-of concentration testing of all eligible cattle. In so doing, these states have at least doubled their surveillance of beef cattle - an effort greatly needed in problem areas.

Some 99 percent of U. S. cattle are now free of brucellosis. States with little infection want to prevent reintroduction of the diease. They recognize that most of the remaining infection is concentrated in a few southern states.

Illinois recently placed restrictions on feeding and breeding cattle coming into that state from Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi and Tennessee. Iowa has announced testing and quarantine requirements for cattle from ten high-incidence states (adding Arkansas, Oklahoma, and Texas) plus three neighboring states (Kansas, Missouri, and Nebraska) which have no special plan for handling cattle from high-incidence areas.

"I expect we'll see more of these embargo actions as additional states gear up to attain 'zero infection' in their cattle herds," says Dr. Becton, "I think we'll also see more states working to assure better coverage in the testing of market cattle. Most authorities agree, if we're going to eliminate brucellosis we must strive to test all cattle entering trade channels. Such an effort ultimately depends on the cooperation of everyone who owns or handles cattle."

Nutrition A La Carte

Here's an idea for breakfast your teenagers might like. You can buy frozen, breaded fillet of sole like those that are so popular in a bun at the drive-ins. Or fish sticks in a bun. Either one takes little time to pan-fry for breakfast, in butter. Or deep-fry or broil them and pop them in a bun.

Vitamins weren't even known in 1900. We knew our food contained proteins, fats, carbohydrates, minerals and water. But when mixtures of just these nutrients were fed to animals, they died; so scientists concluded that there had to be unidentified factors in food that were essential to life. These factors turned out to be vitamins.

Leftovers are fine food, a convenience, and they help out on the food budget. You should know, though, that even under refrigeration, cooked vegetables, for example, do lose some of their vitamin C. Then, reheating takes an additional toll. So plan as wisely as you can, and avoid having leftover cooked vegetables if you can.

Medical research has shown that the great majority of babies in excellent or good condition at birth are babies of mothers whose diets are excellent or good. The mothers, too, enjoyed better health and had fewer complications in pregnancy. This is why mothers-to-be should know and practice good nutrition.

Snacks should be nourishing, and they should help meet your daily need for nutrients. There is little to be gained if snacks are simply candy and soft drinks. Make your snacks small-portion servings of meat, eggs, fish or poultry, fruits and vegetables, breads and cereals, and milk and other dairy foods.

This time of year especially, one relishes the thought of cheese in dips, in hot delicacies such as cheese fondue, on cheese trays, and as a meat substitute. Ounce for ounce, cheese will give you the same high quality protein as meat, poultry, or fish. Three ounces of cheese will give you the same protein as three eggs.

Physical fitness calls for adequate exercise, rest, and good nutrition. Good nutrition means a balanced diet including fish, meat, poultry and eggs, fruits and vegetables, whole grain or enriched bread and cereals, milk and other dairy foods. This kind of eating helps promote physical fitness.

Consumers' Corner

Improper appliance use is often the cause of those washer and dryer woes. For maximum efficiency, take care to.

— Sort properly.
— Use proper detergent.
— Load correctly.
— Use hot water for white cottons and linens, warm for most other loads.
— Use proper cycles.
— Clean lint filters after each use.

To save repair costs check the following on your own before calling the serviceman:

— Be sure controls are properly set.
— If washer doesn't fill, faucets may not be turned on.
— Make sure lid is closed or washer won't spin.
— Unbalanced loads often cause vibration and slower spinning
— Keep drain hose unkinked and free of debris.
— If dryer takes too long to dry, make sure lint trap is clean, check vent, use correct heat settings and don't overload.

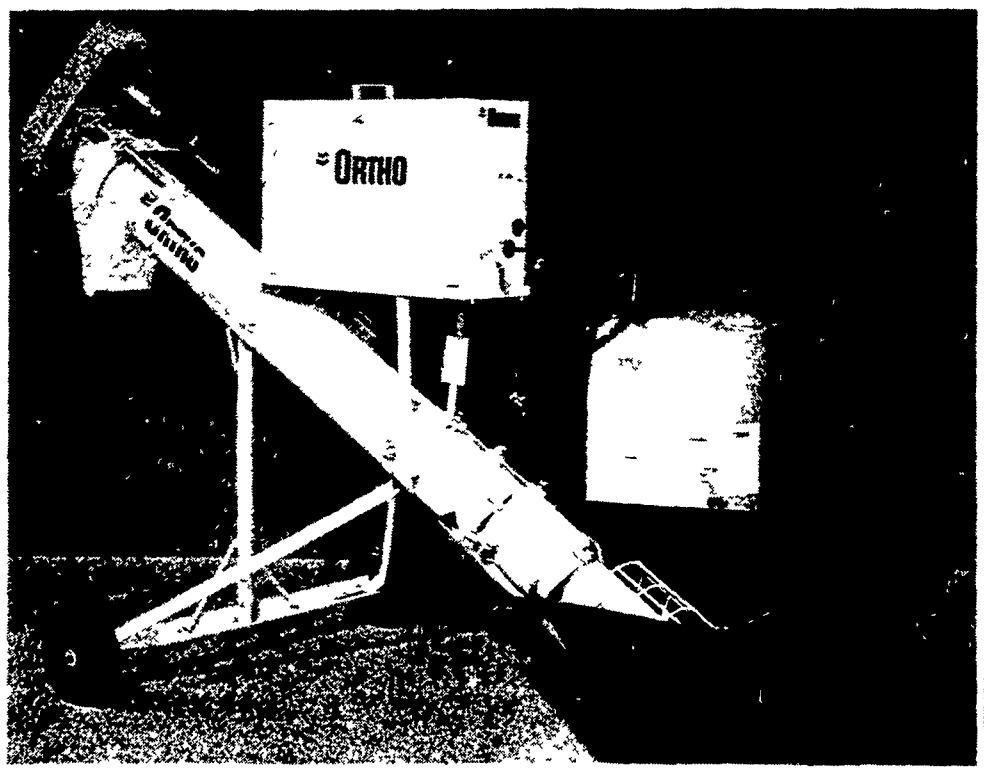
ORTHO-GUARD T.M.
A TOTAL APPROACH TO TREATING AND STORING HIGH-MOISTURE FEED GRAIN.
ORTHO GRAIN PRESERVATIVE

+ Reduces the need for air tight storage.
+ Protects grain quality and feed value.
+ Used on the farm for 3 years.

Ortho Grain Preservative offers a practical way of cashing in on the advantages of harvesting and storing high mositure feed grains.

Ortho Grain Preservative lets you move your crop directly from the field to storage where it gets a chemical coating of protection before it goes into conventional buildings.

The result: there's no need to tie up huge amounts of capital in drying equipment or sealed silos. Grain that's treated according to label directions resist spoilage for up to 12 months when stored in metal bins, wood cribs and similar low cost storage structures.



Unit available on rental basis or can be purchased.

Treats up to 900 bushel per hour, depending on moisture content of grain.

See or call us for complete information on Ortho-Guard T.M. and applicator.

KANYOK FARMS
MILKING HERD DISPERSAL

Tunkhannock, Pa. Wyoming County

Due to the death of my husband I am selling my milch cows.

Farm located on the Vose Road, between Tunkhannock and Lake Carey via Rte. 29. The road leading to Keiserville, watch for Bunnell red auction arrows.

SATURDAY, OCTOBER 12, 1974
1 P.M. SHARP

All Pennsylvania and interstate tested free herd. Many calfhood vaccinated animals. Pregnancy examined by local vet. The good Wyoming County herd consists of 40 milch cows, 10 fresh recently, 12 handling and close springers, several bred for late Fall and early winter. Seven real nice 2 year old bagging heifers.

The Kanyok Family has been breeding with NEBA since 1958 and always use Premium Sires. Here is your opportunity to purchase NEBA daughters that were all raised on this farm.

These animals are large and production you will see.

Terms - cash or approved check.

Owner
Evelyn Kanyok,
Tunkhannock, RD1, Pa.

M. L. Bunnell & Wayne Weaver, Auctioneers & Sale Managers.

VISTA GRANDE SALE
Of Milking Registered Holsteins

FRIDAY EVENING, OCTOBER 18, 1974
7:30 P.M.
To Be Held At the
New Holland Sales Stables, Inc.

All 40 recently fresh and milking well.

16 are 1st calf, 18 fresh 2nd time, bal. fresh 3rd or 4th time.

28 of these cows were fresh and on test in Sept. test, half of the 28 were 1st calf heifers. The 28 ave. 55 lb. of milk per day. Balance will be fresh by date of sale.

We will have projections for most of these animals at sale time.

15 are daus. of "Higher View Model Fob Roman" 2E (91).

2 of his daus. are classified GP84 at 2 yrs.

His daus. fresh second time have exceeded 70 lb. per day.

5 daus. of Vista Grande Haven Wallie E. (91) G.M.
2 Wallis in sale V.G. at 86.
2 follow on Wallis V.G. at 85.
6 daus. of Vista Grande Haven model V.G. 86.
3 daus. of Kingstead Ivanhoe — The milk chart bull.
1 dau. of Meadow Spring Pietertjie Haven EX (91).
2 daus. of Greenwood Ivan EX 90.

Last but not least a Rocby Dina Charm dau. that is milking right at 80 lbs. per day, fresh second time, her udder could be a match for the best udder that will be at the New Holland Show Sale.

Also Daus. of following sires:

6 Vista Grande Haven models; 1 Fob dau., 3 Wallie Lincoln; 2 Greenwood Ivan EX90; 5 Vista Grande Haven Wallie E (91) G.M.; 3 Kingstead Ivanhoe; 15 Roman Dams; 3 Follow on Wallie; 1 Dina Charm; 1 Pietertjie Haven EX 91; 1 Triumph (Crescent Beauty).

If you need milk, plan to be at this sale, they are the best group of producers we have ever offered.

Donors Help "Make 4-H Happen"

"We Can Make It Happen". That's the theme of 1974 National 4-H Week, October 6-12. And observing the occasion are nearly 5.3 million 4-H boys and girls, some 560,000 volunteer adult leaders, plus countless others who support 4-H programs in all 50 states, Puerto Rico and the District of Columbia.

Helping them observe 1974 National 4-H Week are nearly 60 businesses, corporations and foundations that support the Cooperative Extension Service administered 4-H program through the National 4-H Service Committee.

In 1974, the National Committee has budgeted nearly $3½ million dollars to aid the national 4-H program. These funds provide educational aids and literature, incentives and recognition, leader training and numerous other services.

In the area of incentives and recognition, corporate friends of 4-H help 4-H'ers "make it happen" by providing 265 educational scholarships valued at $184,100. Many of these grants will be awarded during the 53rd National 4-H Congress in Chicago, Dec. 1-5. A high percentage of the 1,600 teens scheduled to participate in five days of seminars, tours, events and entertainment earn expense-paid trips given by friends of 4-H.

By bringing together young people of different racial, economic and social backgrounds in various pro-

Donors Salute 4-H Youth

grams and activities, 4-H provides youth with the opportunity to interact and to help "make it happen". Interaction and communication between young people and adults are fostered through 4-H participation. Such dialog and cooperation contributes measurably to the molding and shaping of youthful lives and preparing them for adult life.

Many 4-H programs are particularly relevant in terms of concerns expressed by today's youths and adults alike. Among them bicycle safety is a fast growing and popular program among 4-H'ers. In the 4-H bicycle program, sponsored by The Goodyear Tire & Rubber Company, youths learn how to safely operate and maintain their bikes and assume leadership roles with younger children.

With increasing emphasis being placed on agricultural production, numerous 4-H projects contribute directly to much needed food supplies. Assisting in the sheep program is Wilson & Co., Inc., Kentucky Fried Chicken supports the poultry program and The Chicago Board of

* * *

Trade, work in commodity marketing.

Related programs, like veterinary science and entomology, sponsored by The Upjohn Company and Hercules Incorporated help 4-H'ers learn while fighting diseases and predators in both plants and animals.

Other 4-H programs combine learning with responsibility and fun. These include dog care and training, supported by Purina Dog Foods Group, Ralston Purina Company and horse by Top Form Products Dept., Merck & Co., Inc. and Ralston Purina's Horse Chows Division. Leading to improved communications is the public speaking program with Union Oil Company of California as sponsor.

Volunteer 4-H leaders and members are assisted in updating their sewing skills in a special program, Your Sewing Machine, supported by The Singer Company. And outstanding 4-H alumni are identified, honored and encouraged to maintain their interest in the 4-H alumni recognition program, sponsored by Olin Corporation.

More general support of 4-H programs and activities come from Elanco Products Company; Elgin Watch Company, Allis-Chalmers Corporation; International Minerals & Chemical Corporation; The Conrad Hilton Hotel; Armour & Company and E.I. Du Pont de Nemours & Company.

Together, these 4-H members, leaders and friends of 4-H are saying — We Can Make It Happen

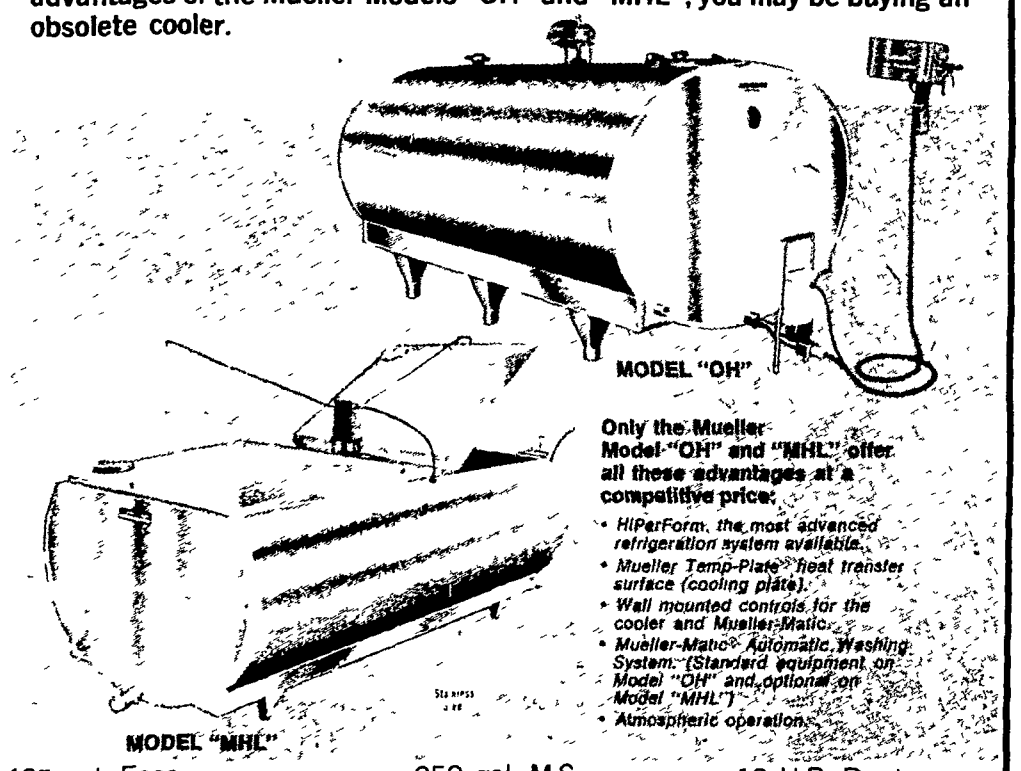
SPECIAL OF THE WEEK

OCTOBER 7 THRU 12

800 O.H.

The Mueller Models "OH" and "MHL" with HiPerForm make all other bulk milk coolers obsolete.

If you are in the market for a bulk milk cooler and you don't check all the advantages of the Mueller Models "OH" and "MHL", you may be buying an obsolete cooler.



Only the Mueller Model "OH" and "MHL" offer all these advantages at a competitive price:

- *HiPerForm, the most advanced refrigeration system available.*
- *Mueller Temp-Plate heat transfer surface (cooling plate).*
- *Wall mounted controls for the cooler and Mueller-Matic.*
- *Mueller-Matic Automatic Washing System. (Standard equipment on Model "OH" and optional on Model "MHL")*
- *Atmospheric operation.*

Wayne's Dairy Care-Van Conference will help you put the pieces together.

The future belongs to dairymen who can fit these pieces together for maximum returns.

That's why Wayne's Dairy Care-Van Conference can be the most important four hours you'll invest this year.

Check these points to be covered in the Dairy Care-Van Conference:

1. **Protecting high investment.**
2. **Preventing health problems.**
3. **Balancing nutritional needs.**
4. **Milking more money.**

You'll get the latest advice of recognized dairy experts in each area. Plus discussions with other dairymen. Finally, you'll be shown how the Wayne Maximizer Program can help you put it all together—for the clearest estimates of cost and profit you've ever had.

Dairy Care-Van will be at the following time and place:

Guernsey Pavillion
Lancaster, Pennsylvania
October 22, 1974
10:00 A.M. until 2:00 P.M.

WHOLESALE DISTRIBUTORS

Telephone (717) 761-3780

304 Keith Road, Mechanicsburg, Pa. 17055

In celebration of our Third Birthday, we present a splendid line of merchandise to the milk-producing readers of the *Lancaster Farming*.

We offer this merchandise at discount prices that are realistic and far cheaper than can be found elsewhere. We can accomplish this only by eliminating the middleman. To do this, we buy directly from the manufacturer and pass the many middleman profits directly to the dairy farmer. All products meet federal regulations. Because of existing economic conditions, we must limit the amount of purchase on some items. All prices are direct-to-the-farm prices unless otherwise noted. For orders under $25, add $1.00 service charge. Include check with order.

1. ANTIBIOTICS (INJECTABLE)

100 cc Pen-Dihydro $3.10; **$18.00** per six-pak 100 cc; **$71.00** per 24 100 cc. Limit 24 per customer

ORDERS WILL BE FILLED ON A FIRST-COME, FIRST-SERVED BASIS, SINCE MANY ITEMS ARE IN SHORT SUPPLY NATIONALLY AND MAY BECOME UNAVAILABLE DURING TERM OF THIS SALE.

BOB COON, GEN. MGR.

Nancy L. Lefever

Postmaster and Active Hobbyist

by Mrs. Charles McSparran Farm Feature Writer

Mrs. R. Dean (Nancy L.) Lefever, who lives on Noble Road in Colerain Township, Lancaster County, is postmaster of the Kirkwood Post Office, an efficient housewife and mother of three teenagers, gardener, secretary, hosts a crafts group, takes her place in community organizations and yet finds time for music and several hobbies.

Mrs. Lefever was commissioned postmaster April 13, 1974, after having served as part time clerk at the Kirkwood Post Office for nine years and having been appointed officer in charge December 3, 1973 when her mother-in-law, Mrs. Barton Lefever retired.

Kirkwood Post Office, zip coded 17536, is a third class post office serving 1150 people or 305 families. The assistant postmaster is Mrs. Fount (Mary Lou) Shaub of Kirkwood. Thomas Ferguson Jr. has served as carrier for the one rural route for 25 years and has the reputation of being a very good mailman.

Nancy, the daughter of Mr. and Mrs. Charles Anderson, Oxford RD2, has been a lifetime resident of Colerain Township. She grew up on her parents' general farm. They raised several acres of peas and Nancy helped milk, tended to chickens, ran the tractors and helped with the garden. Her parents have since sold the farm to her brother but still live there.

Nancy graduated from Solanco High School and received diplomas for secretarial and third class postmaster courses from the U.S. Postal Service Correspondence Course at Norman, Oklahoma.

She was employed by the Solanco School District for nine years as secretary at Bart-Colerain Elementary School prior to becoming postmaster. She served on the publicity committee for Bart-Colerain Elementary School for meetings, festivals etc., sending notices to parents, newspapers, radio and television stations. She serves as secretary of the Colerain Township Planning Commission which meets once a month.

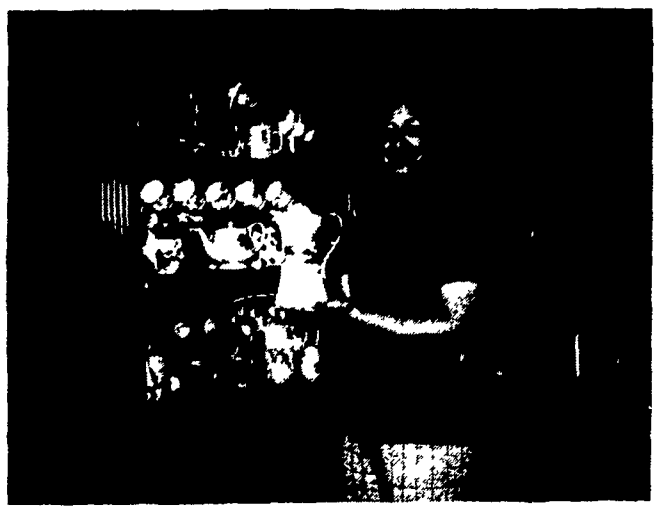
Mrs. Lefever has been a member of Farm Women Society 15 for fifteen years or more and served on all their committees. She will be entertainment chairman next year. She helped at their food stand many years at Solanco Fair until they discontinued it two years ago.

She has been a member of Robert Fulton Chapter 446 Order of Eastern Star for 14 years, is a past Matron and has contributed in some way ever since she joined. She helped at their sub food stand this year at Solanco Community Fair. She is a past district Deputy Grand Matron for district 16-C which is comprised of 10 chapters in Lancaster County and 1 in Chester County.

Mrs. Lefever is chairman of Clothing Depository for Boy Scout Troop 87 in Kirkwood. She thinks Scout uniforms should be used as long as they are wearable and says if anyone has Boy Scout uniforms to sell their troop would be interested in buying them.

Nancy was in the sewing, cooking and flower 4-H clubs six or seven years and later served as leader of the Kirkwood Community (cooking and sewing 4-H Club for five years.

Dean and Nancy are members of Union Presbyterian Church and the family attends there. Nancy used to be active in the choir, circles and the Women's Association.



Nancy Lefever has a collection of over 60 tea pots. This happens to be an old cocoa pot originally bought in 1910 that she is holding. She bought it in a gift shop in recent years.

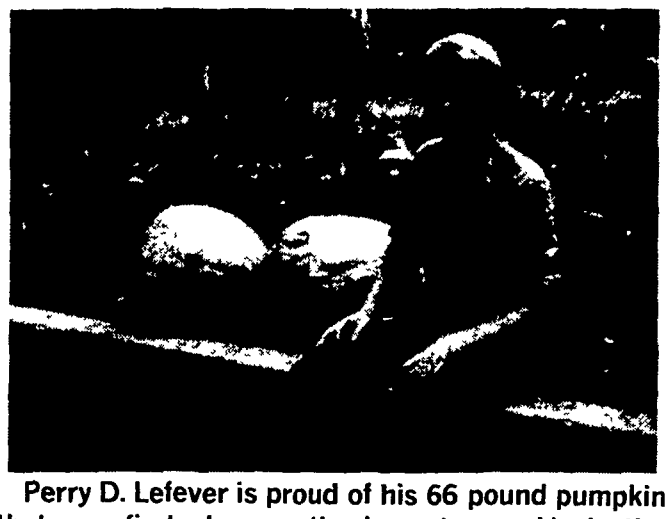
She played the piano for the Junior choir at one time.

Nancy is married to Rodney Dean Lefever, son of Mr. and Mrs. Barton (Jack) Lefever, Kirkwood RD1. He has always lived in Colerain Township and graduated from Solanco High School. He grew up on his parents' farm and helped with the farm work. He is now employed by Ferguson and Hassler in the Thriftway store at Quarryville. He enjoys hunting and sports.

Lefevers have three children. Vicki (Victoria) Kay graduated from Solanco last June. She took a Floriculture course at Brownstown Vo-Tech School and did Co-op work at Gary Hunter's greenhouse in Quarryville. She is presently employed in this type of work at the Cla-Mart Gift Shop, Quarryville. Vicki was in 4-H sewing one year and in 4-H cooking one year.

Perry is a Freshman at Solanco High School, taking the Ag course. He has been helping his grandfather and his uncle with their farm work and his ambition is to farm. He is also on the Varsity soccer team and has wrestled since fifth grade in school. He has also been in Boy Scout Troop 87 for five years.

As a family they have nearly an acre in garden on Dean's parents' farm and the boys exhibited vegetables at the Solanco Fair. Perry had the largest pumpkin in the



Perry D. Lefever is proud of his 66 pound pumpkin that won first place as the largest pumpkin in the Rural Youth classification at the Solanco Fair this year. The pumpkin to the left belonging to his brother David won second place and weighed 58 pounds.

Rural Youth division and David second largest. Perry's blue ribbon pumpkin weighed sixty six pounds and David's fifty eight pounds. David also exhibited and won prizes on tomatoes, peppers, corn and cucumbers. Nancy freezes and cans a lot of vegetables.

Lefevers have held softball games for area people, maintaining the ball field, also on the farm, and hosted picnics for Scouts and other groups for five years. They play softball Sundays from 3 to 5 p.m. Nancy says, "I am an armchair enthusiast. I keep score and bind wounds." Dean and the boys were in a Judo class at Bart-Colerain School for one and a half years. From 5 to 15 were in the class. Nancy just watches this sport.

Dean and the boys go hunting locally for deer and small game. Dean hunts turkeys in the mountains and used to hunt deer there also.

The family also enjoys music and all play instruments together. They have Dean's grandmother's old reed organ and a piano which Nancy plays. Dean plays the trombone, Perry drums and David guitar. Vicki also took piano lessons. They invited other musicians in to play their instruments recently for a birthday party Nancy says she plays for her own enjoyment

Lefevers befriended Roy Allen Huss, Union, by having him at their place weekends for nine years and he was like one of the family. They are proud of him as he has been active in Scouts and church and now is attending Harrisburg Community College and taking a law enforcement course.

Nancy says, "Four years ago I organized "The Crafties", a group of women interested in learning about and making various crafts. We started with Christmas card balls and progressed to men's ties, paper Christmas wreaths, candles, huck weaving, pine cone wreaths and even an evening of candy making. Two years ago Mrs. Charles (Betty) Miller, Quarryville RD3, incorporated ceramics into our classes at Springville School House." They meet every Wednesday except the first Wednesday of the month. The average attendance is 12 to 15 per week

Mrs. Nancy L. Lefever, Kirkwood RD1, made this pine cone wreath and demonstrated making them in crafts class.

and they usually meet in Lefevers' basement. They pay $1. an evening and also bring some materials. Nancy helps demonstrate each week. Their 1974 fall schedule starting October 9 includes making a Christmas plate, a draped angel, corn husk dolls, flowers and wreaths, fiber flowers, yarn poodles and a Snoopy dog house. This season will end with a Christmas party and covered dish supper. Teachers this fall will be Mrs. Betty Miller, Mrs. Beulah Herr, Mrs. Novelda Ferguson and Mrs. Alma Clendenin.

Besides Mrs. Lefever's crafts her hobbies include reading novels and biographies, sewing, quilting and knotting quilts. She made six full bed size cross patchwork quilts and two crib quilts last winter. She has refinished several pieces of furniture and is doing a spool bed now. She buys some antiques from friends. She collects tea pots, especially those of friends and neighbors that would have a sentimental value. She has over 60 on a shelf on two walls of her kitchen, in a corner cupboard and elsewhere in her house.

Here are some of Lefevers' favorite dishes. Dean uses this recipe to make ice cream and the second recipe is a hearty stew that Nancy concocted.

ICE CREAM (8 quarts)

12 eggs
4 cups sugar
3 tablespoons vanilla
1 tablespoon cornstarch
1 pt. cream
2 qts. milk or fill can 2-3 full
1 pinch salt

Beat eggs, sugar, vanilla, cornstarch, salt and cream together. Add milk and freeze. It is better if allowed to set awhile before freezing. Do not cook the mixture.

GARDEN FRESH STEW

Serves 8 to 10

3 lbs. beef chuck, cut in cubes
¼ cup flour
3 tablespoons shortening
1 medium onion, sliced
½ teaspoon salt
⅛ teaspoon pepper
2 qts. home canned tomatoes
½ cup water
4-6 carrots sliced
2 cups sliced celery
4 medium potatoes, cubed
1 teaspoon Italian seasoning (optional)
Dumplings

(Continued from Page 38)

Lightly coat meat with flour, salt and pepper; brown in shortening; add onion to tomatoes and water; add carrots, celery, potatoes and seasoning. Cover and simmer for 2 hours or until meat and vegetables are tender.

Approximately 15 to 20 minutes before serving add dumplings and cover pan again to bubble.

Dumplings:
1 cup flour
½ teaspoon salt
1½ teaspoons baking powder
½ cup milk
2 tablespoons melted fat or salad oil to make soft dough

Combine ingredients and drop into bubbling stew by teaspoonful. Cover pan and cook for 15 minutes.

Served with a tossed salad, iced tea or milk.

HAZEL'S APPLE DUKEY

1 cup sugar
butter or oleo the size of an egg
2 cups flour
3 teaspoons baking powder
½ cup milk or water
1 egg
pinch of salt
vanilla

Slice apples in bottom of buttered dish, dot with butter and sprinkle on cinnamon. Pour batter on top. Bake at 325 degrees in glass dish about 50 minutes.

Serve warm or cold with ice cream or milk.

RAISIN.NUT SPICE CAKE

1 cup raisins
2 cups water
½ cup shortening
1 cup sugar
1¾ cups flour
1 teaspoon soda
1 teaspoon cinnamon
1 teaspoon cloves
1 teaspoon nutmeg
1 teaspoon allspice
¼ teaspoon salt
1 egg beaten
½ cup chopped walnuts (optional)

Add water to raisins and boil 10 minutes. Remove from heat, add shortening and let cool while you sift together sugar, flour, soda, spices and salt. Add to cooled raisin mixture and beat well. Add egg and beat again. Bake at 375 degrees for 35 to 40 minutes in a 9" x 13" pan which has been greased and floured.

SURPRISE VANILLA DELIGHT

2 packs of instant vanilla pudding (3½ oz.)
3 teaspoons vanilla
1 envelope of Dream Whip or one small container of Cool Whip
2 bananas

USE BLENDER to make vanilla pudding and follow box directions, add vanilla. After making pudding slice bananas into pudding and add Dream-Cool Whip. Place in large bowl and chill. Crumbled vanilla wafers can be sprinkled on the top. Quick and easy dessert - a delight to serve.

Farm Women Societies

Society 4

Society of Farm Women 4 held election of officers for president and vice-president. Mrs. Henry Reist was elected president and Mrs. Edwin Yeaglin was elected as vice president.

Delegates to the State Convention in Harrisburg in January will be Mrs. Charles Newcomer and Mrs. Cyrus Gamble.

Next meeting will be Sat., Oct. 26th at the home of Mrs. Fianna Wile, Mountville with Gerald Lestz on "Our Amish Heritage."

Farm Women Calendar

Tuesday, Oct. 8
Farm Women Society 22 Meeting 1:00 p.m.

Wednesday, Oct. 9
Personnel management Meeting at the Farm and Home Center 9:00 a.m. - 4:00 p.m.

Thursday, Oct. 10
Farm Women Society 9 meeting at the Colemanville United Methodist Church.

Friday, Oct. 11
Farm Women Society 13 meeting at 7:30 p.m.

Society 21

Farm Women Society No. 21 met at the home of Mrs. Frank Aument. Co-Hostesses were Mrs. Melvin Meck and Mrs. Richard Wood. Nineteen members were present with one guest. Roll call was answered by imitating the sound of an animal.

President, Mrs. James Long, led the business portion of the meeting. The annual Christmas bazaar will be held on November 14. We might go to Conestoga View in November to entertain the guests. A 25 dollar donation will be sent to meals on wheels.

The county Convention is to be held on November 2. Tickets are available for $4.00 each.

The Ways and Means committee handed in funds to the treasurer.

Members were reminded that dues will be collected at the next meeting.

Thank you notes were received from Mrs. John Delong, Mrs. James Shenk and Mrs. Charles Long. A long dress or skirt are the two choices for Sewing Garment of the year. Our November meeting was changed from November 14 to November 7. Our program was Country Fair night with Mrs. Thomas Bradley winning with the most ribbons and Mrs. William Arrowsmith for the most blue ribbons.

Ann Brown Sec.

Society 27

Society of Farm Women 27 held a Work Project night at a recent meeting at Mrs. Wilbur Erb's home. Mrs. Herbert B. Frey was co-hostess. Mrs. Sam Heieman was in charge of the devotions.

During the Work Project time terry cloth bibs, washable bed pads, physical therapy cylinders, and disposable newspaper bags were made for a nursing home. Life saver yarn dolls were also made. The total of all items made, came to a count of 60 dozen items completed.

Mrs. Albert Fry Jr. was re-elected as President for one year and Mrs. Robert Shearer was voted as Recording Secretary for two years.

Children of the members will be entertained at a Halloween Party, October 22, in Mrs. Robert Shearer's barn.

Thought For Food

Rock Lobster Currie, Afrikaans

Parboil 2 packages (8 oz. each) frozen South African rock lobster tails by dropping into boiling salted water. When water re-boils, drain immediately and drench with cold water. Cut away underside membrane and remove meat from shells in one piece. Peel and mince 1 medium onion. Pare and dice 1 medium apple. Melt ¼ cup (½ stick) butter in skillet and saute onion and apple until yellow, but not brown. Stir in 3 tablespoons flour and ½ teaspoon salt. When blended, add 1 cup chicken stock and stir over low heat until sauce begins to thicken. Stir in 1 cup cream and continue stirring until smooth and thick. Add ½ to 1 teaspoon curry powder. Dice cooked rock lobster meat. Add to sauce and heat thoroughly. Serve with boiled rice, chutney, canned peanuts and coconut. Yields 6 servings.

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Synthetic Leather Is Fashionable and Easy to Sew

If you plan to add a synthetic leather garment to your fall wardrobe, the popularity of the drop shoulder provides a variety of patterns that are suitable for a leather-like fabric.

Set-in sleeves can be managed, but it is better to avoid them because reshaping the cap of the sleeve to eliminate most of the ease is a tricky job. If you do use a set-in sleeve, experiment with muslin first.

Select a pattern with seaming instead of darts. Usually yokes and side-front seams provide all the shaping you will need. Plan to topstitch all edges to hold the fabric flat.

The suede finish fabrics are not a problem to machine stitch, however they usually have a nap so all pattern pieces should be cut in the same direction.

The smooth shiny synthetic leathers will stick to the machine when you try to topstitch. An easy remedy is to coat the fabric along the seamline with a very thin layer of corn starch before feeding it through the machine. After the machine stitching is done, wipe off the cornstarch with a damp cloth. Cornstarch is preferable to oil because it is so easy to remove, however, a drop of oil at the needle works fine.

A glover-type sewing machine needle is best for real leathers, but a heavy duty needle is all that is needed for the synthetic leathers.

Try a synthetic leather for the bound buttonholes in a bulky wool coat, or add leather yoke, facings and collar to a wool or corduroy jacket.

To make children's skirts or pants go another year, add a band of leather to the hem and a matching pocket, vest or jacket.

Using Ornamental Gourds

Gourds are among the oldest cultivated plants. Utensils made from them have been found in the tombs of the ancients. Some have been found in Egyptian tombs of the Twelfth Dynasty or about 2200 or 2400 B.C. Through all time of which we have authentic history, gourds have been used as ornaments, or making utensils of various kinds, including water flasks, dippers, and containers for stored grains, for bird houses, and many other purposes.

Many home gardeners like to grow gourds and you will find these in good supply at roadside markets.

Frequent inquiry is made as to the best method of curing gourds. Some tips on gourds:

They are sometimes taken from the vine before mature. Since most gourds need the complete growing season to mature their fruits and the fruits do not cure well unless mature and colored gourds are not fully colored until mature, they should be left on the vines as long as possible.

If the skin is hard and unyielding to thumbnail pressure, the fruit is close to maturity and may be removed.

In removing the fruits, it is advisable to cut them from the vines with pruning shears or a sharp knife allowing two or three inches of stem to remain attached to the fruit.

Immature fruits are not apt to cure and keep well.

After harvesting, the fruits should be cured in a light, warm, dry, well-ventilated place for several weeks. It is necessary to keep them dry at all times.

In order to preserve the color, a light rubbing with a very high grade transparent furniture polish is recommended. This will exclude the air and preserve the gourd.

Food Marketing Report

As of mid-September, the supply situation in October is expected to look like this...

Red Meats

Beef to continue plentiful, with production record large for the month. This mostly reflects larger supplies of lower grade beef.

Pork supplies to be adequate. Output, nearing the seasonal peak, will exceed the year-ago level. Production, however, will be below the October 1970-72 average.

Poultry & Eggs

Eggs to be adequate, with output about 2-3 percent below the relatively low level of October 1973 and about 6-7 percent below the 1971-73 average.

Broiler-fryers to be limited, with production 10 percent less than a year ago and 2 percent under the 1971-73 average.

Turkeys to be plentiful, with marketings 10 percent under October 1973, and 8 percent below the 1971-73 average. Cold storage stocks remain at record, one-third more than the 1971-73 average.

Milk & Dairy Products

Fluid milk, butter, cheese, and nonfat dry milk to be adequate, though production will decline seasonally. Commercial stocks of cheese to be at record levels, and stocks of butter and nonfat dry milk well above the 1971-73 average.

Fruits, Vegetables, & Nuts

Fresh cranberries and cranberry products to be plentiful, with total output at near record level–6 percent above last year and 4 percent above the 1971-73 average.

Pears to be plentiful. Production is estimated to be close to last year's and 4 percent above the 1971-73 average. Bartletts will still be available, and record Pacific Coast crop of mainly Bosc and Anjou varieties is being harvested.

Apple supplies to be adequate. The commercial crop is slightly below last year's but equal to the 1971-73 average.

Fresh grapes to be adequate. Production in California, where most fresh grapes originate, is down 3 percent from 1973, but 17 percent above the 1971-73 average.

Ida's Notebook

Ida Risser

This seems to be a good year for gathering nuts. There is an abundant supply of shellbarks and black walnuts. Due to the high price of nutmeats, it appears advisable to pick-up dry and crack our own nuts. All it takes is time and energy, which are hard to find sometimes.

I'm told that years ago the chestnut trees were very plentiful here in the county. My mother tells of whole classrooms taking afternoons off and walking several miles to gather chestnuts. Before desease destroyed the trees, the soft shelled, sweet edible nut was often roasted in the coals of a fireplace before eating. Nowadays, we would sooner just open a box or can and find the food already prepared for eating.

On Saturday we drove to Mansfield to visit our daughter at college during parents weekend. It was a rainy day and we did not attend the football game. Instead we toured some of the buildings and chatted a lot.

We also got a preview of beautiful fall colors on the mapel trees that dotted the hillsides. As usual we saw a number of deer grazing at the edge of the woodlots as we drove home in the evening.

xxx

The first two frosts did not hurt my garden and there are still twenty different vegetables growing for me to choose from, when I plan supper. The parsnips are a favorite of mine but green beans are the children's preference.

Speaking of beans reminds me of the production I got from 30 cents worth of Kentucky Wonder seed – enough to sell 5 bushels. Also my soybeans were sold to a Health Store in the area.

Home On The Range

Lunch Box Bars

1 package (3 ounces) fruit flavored gelatin
1-3 cup light corn syrup
2 tablespoons soft butter
4½ cups Cheerios

Butter a 9 inch square pan. In a large saucepan blend together gelatin corn syrup and butter. Heat to boiling over medium heat stirring constantly. Remove from heat, stir in cheerios until thoroughly coated. Turn into prepared pan. Butter back of spoon spread mixture in pan. Refrigerate. When set about 30 minutes cut into bars.

Margaret Oberholtzer
Age 12
Leola

xxx

Graham Cracker Crust

9 inch pie pan
preheated oven 275 degrees
baking time 8-10 minutes

1 2-3 cups crumbs or about 20 graham crackers rolled fine
¼ cup granulated sugar
¼ cup softened butter or margarine
(do not melt butter or margarine)

Thoroughly blend together the crumbs, sugar and softened butter or margarine. Press firmly into an even layer against bottom and sides of pie plates. Bake at 375 degrees.

Cool before filling.

Anna Brubaker
Age 14
Millmont

xxx

Fresh Apple Cake

3 eggs
1½ cup oil
1 teaspoon vanilla
Sift together:
2 cups flour
1 teaspoon cinnamon
1 teaspoon soda
1 teaspoon salt

Add 2 cups raw sliced apples. Then add ½ cup raisins or add ½ cup coconut if desired. Bake at 350 degrees for 45 minutes. Use a 9 x 13 pan. Dust with confectioners sugar when cake comes out of oven.

Lori Anne Murry
Lancaster

xxx

Brownies

1-3 cup Crisco
1 cup sugar
¼ teaspoon salt
2 eggs
2 squares chocolate
½ teaspoon vanilla
2-3 cups sifted flour
¼ to 1-3 cup chopped nut meats

Blend shortening, sugar, salt and eggs together.

Melt chocolate over hot water, add with vanilla to mixture, add flour and nut mixture and mix until smooth. Spread batter one half inch thick in a square pan which has been rubbed with shortening. Bake in moderate oven, 350 degrees for 25-30 minutes. Cut in squares or oblong strips. Remove from pan immediately after cutting.

Mabel Kurtz

Womelsdorf

xxx

Opra Fudge

4 cups sugar
1 pint cream

Mix well. Boil without stirring when begins to a bubble and add butter size of walnut. Boil until it forms a soft ball in water. Pour on buttered platter. Add 3 teaspoons vanilla. When cold beat until creamy then make it into little balls.

Chocolate Coating

1 package semi-sweet chocolate bits
¼ bar wax
2 ounce unsweetened chocolate
dip in chocolate

Nancy Martin
Age 14
Ephrata

Delicate Cheese Sticks

1 cup freshly grated yellow cheese
½ cup butter or margarine
¼ teaspoon baking powder
¾ cups sifted flour
½ teaspoon salt
½ teaspoon dry mustard or chili powder
4 teaspoons ice water

Blend room-temperature shortening with grated cheese. Sift dry ingredients together. Blend into cheese mixture alternately with the water, 1 teaspoon at a time. Chill well and roll out like pie dough. Cut into 6 x ¼ inch strips. Bake at 350 degrees on an ungreased cookie sheet, till just lightly browned, about 8-10 minutes.

Esther Stoltzfus
Age 12
Leola

xxx

Chocolate Chip Cookies

½ cup shortening
½ cup sugar
¼ cup brown sugar
1 egg
1 teaspoon vanilla
1 cup and 2 tablespoons flour
½ teaspoon salt
½ teaspoon soda
1 cup semi sweet chocolate bits
½ cup chopped nuts

Combine shortening and sugar, blend in egg and vanilla. Add combined dry ingredients and mix well. Stir in chocolate bits and nuts. Drop from teaspoon onto ungreased cookie sheets. Bake at 375 degrees for 10-12 minutes.

Bertha Martin
Age 15
New Holland

xxx

Raisin Cookies

Cream together:
½ cup butter
½ cup shortening
2 cups granulated sugar
3 eggs

Cook two cups raisins with ½ cup water till soft.

Sift together:
4 cups flour
1 teaspoon baking powder
1 teaspoon soda
1 teaspoon cinnamon
1 teaspoon salt

Cool raisins before adding.

Lizzie Huyard
New Holland

xxx

Cottage Pudding

1 cup sweet milk
1 cup sugar
3 cups flour
2 eggs
1 teaspoon baking soda
1 teaspoon cream of tartar
1 teaspoon salt
1 tablespoon butter

Mix together and bake slowly up to 350 degrees.

Can put sliced apples in bottom of pan and pour batter over before baking.

Daniel Burkholder
Age 11
Mifflinburg

xxx

Butterscotch Cookies

2 cups brown sugar
1 cup butter
beat well and add:
1 teaspoon salt
2 beaten eggs
1 teaspoon vanilla
1 teaspoon cream of tartar
sift together:
4 cups flour
1 teaspoon soda

Knead like pie dough, shape into loaf and slice.

Learn To Sew Menswear

The Cooperative Extension Service is sponsoring a course on learning to sew a man's knit sport coat. Carol Rothermel, Assistant Extension Home Economist, says the course consists of 5 meetings and will teach how to make a man's or boy's knit sport jacket using simplified methods, not the conventional tailoring techniques. A person with average sewing skills can master these new easy techniques. According to Mrs. Rothermel learning and using these skills is one way of helping fight inflation in the clothing budget. The course will also be finished in time for Christmas gift giving in case anyone has that purpose in mind.

The men's knit jacket course will be held at the Chester County Extension Service, Paul B. Dague Bldg. (3rd floor), 235 W. Market Street, West Chester for 5 consecutive Thursday mornings from 9:30-11:30 a.m., starting October 24, 1974. There is a small fee for the course. Pre-registration is required because the size of the class is limited to be sure each individual has adequate time for questions. Call or write the Chester County Cooperative Extension Service, 696-3500 for information on registration.

The deadline for registering is October 16, 1974.

Rummage Sale

A Rummage Sale will be held Friday, October 18, from 10 a.m. until 4 p.m., at the home of Mrs. Marlin Fahnestock, Mastersonville. Follow the signs from the square in Mastersonville. Proceeds will be donated to the Elizabethtown - Mount Joy group of La Leche League. All types of clothing will be offered, including maternity, infants, and children's wear, as well as toys and household items. Donations will be welcomed prior to the sale.

ORANGE JUICE: FROM GROVE TO GLASS

If you had to get up every morning and squeeze enough oranges to give your family their daily juice, you'd soon realize how lucky you are to have frozen concentrated orange juice.

On top of being easy to prepare, frozen concentrated juice, a recent U. S. Department of Agriculture study shows, costs less than half as much as enough fresh oranges to make the same amount of juice.

Let's take a look at how oranges reach your table in such a convenient and cost-saving form. It all starts in the orange groves where raising oranges for processing is big business. Last year, over four-fifths of the $540 million worth of citrus produced in Florida for example, went into frozen concentrated orange juice.

As the tons of oranges are harvested, they are packed for shipping to processors. Different varieties are grown in the many groves; some varieties are sweeter, some have more juice than others. Uniform good quality and taste will be maintained by the careful blending and testing of these many varieties of oranges throughout processing.

In Florida, State law requires that frozen concentrated orange juice meet specific USDA requirements for flavor and color, as well as additional State requirements. USDA inspection and grading services are usually voluntary, but all frozen concentrated orange juice processed in Florida is required by State law to be made under USDA inspection. USDA works closely with the Florida Department of Citrus and with processors to bring you consistently high quality orange juice. Most of that produced in Florida qualifies for U.S. Grade A.

When oranges arrive at the processing plant they are examined before they are made into juice. Fresh fruit and vegetable inspectors with the Federal-State Inspection Service test for degree of sweetness and the ratio of sweetness to acid. The test tells the processor approximately how much juice he can expect from the oranges and services as the basis for the payment of the grower. The oranges are then placed in bins to await processing. Here inspection responsibilities are turned over to a USDA inspector specializing in processed products. It is the inspector's responsibility to insure that the plant is operated under sanitary conditions and that the juice is the desired quality.

The inspector checks the processing of the juice from start to finish. He begins by checking the washing and sorting process to be sure that only good, clean fruit is used to make the juice.

The juice extracting machine makes quick work of the squeezing process. The juice flows from this machine to equipment that removes seeds and coarse pulp.

The juice moves on to the blending machine where an inspector checks the juice in each tank for its degree of sweetness and ratio of sweetness to acid. These are the two most important factors in the flavor of the juice. The juice then is skillfully blended to obtain the desired flavor.

Specially designed evaporators are used to concentrate the juice. The juice flows or falls in a thin layer under vacuum through a slightly heated atmosphere. Water in the juice vaporizes and evaporation continues until the juice reaches a high concentration of sugar solids.

The concentrate is now ready to be filled into cans, but before this happens processor and inspector want to be sure it measures up to the desired standards.

More tests determine what last minute adjustments are necessary to standardize the sweetness, flavor, and color. On the basis of the test results, the processor adds specially prepared fresh juice. This juice contains fruit cells and flavor carrying orange oils saved when the oranges were first squeezed. High quality concentrate may also be added.

In addition to his tests for sweetness and acid content, the inspector checks the concentrated juice for defects, such as small pieces of seed or specks that may occur if the juice is overheated during the evaporation process.

When the inspector is satisfied with the concentrate, he reconstitutes a sample and checks the color and flavor of the juice.

After the containers are filled, the inspector must be sure the cans contain the 6 to 12 ounces listed on the labels. Other tests are made to tell if the juice has been processed properly and will reconstitute without jelling or separating.

Does it sound like a lot of work? It is, but it is all necessary to bring high quality frozen concentrated orange juice to your breakfast table.

Fresh Peach Pie

1 cup sugar
1 cup water
½ teaspoon salt
3 tablespoons cornstarch or clear jel
½ box peach jello

Mix sugar, set and clear jel. Add water and cook until clear. Add jello to clear mixture and cool. Mix sliced peaches with jello and put in baked pie shell and chill. Top with whipped cream.

Mrs. Leroy Smucker
New Holland

xxx

Hearty Casserole

2 cups diced carrots
1½ cups diced celery
6 medium diced potatoes
3 tablespoons butter
2 tablespoons flour
2 cups milk
1 cup meat stock
1 cup peas
1 teaspoon salt
1 small onion
2 cups cooked meat

Soak bread crumbs in 3 tablespoons melted butter. Cook vegetables separately until soft. Melt butter and blend in flour, add milk and meat stock. Stir until thick. Add salt and combine sauce with other ingredients. Pour into greased casserole and sprinkle with buttered crumbs. Bake at 350 degrees for 40 minutes.

Mrs. E. F. Lapp
Peach Bottom

xxx

Chili Con Carne

2-3 cups cooked kidney beans
1 pound ground beef
1½ teaspoon salt
1 tablespoon flour
1½ teaspoon chili powder
1 minced onion
2 cups tomato juice

Fry onion until slightly brown, add meat, add flour, salt and chili powder to meat and mix together. Then add tomato juice, cover and let simmer slowly for one hour. Add kidney beans and bring to a boil.

Mrs. D. Martin
Ephrata

xxx

Golden Eggplant Casserole

2½ cups peeled-cubed eggplant
18 soda crackers (crumbled)
½ cup shredded sharp cheese
1 tablespoon melted butter or margarine
¼ cup chopped celery
½ teaspoon salt
¼ teaspoon pepper
1 cup cream or evaporated milk

Combine and bake.

Mrs. Amos Zook
New Providence

xxx

Yellow Cake

2 egg whites
1-3 cup sugar
2 cups sifted cake flour
1 cup sugar
3 teaspoons baking powder
1 teaspoon salt
1 cup milk
½ cup cooking oil
1 teaspoon vanilla
2 egg yolks

In a small bowl beat egg whites with 1-3 cup sugar until thick and glossy but not stiff. Set aside.

In a mixing bowl combine flour, 1 cup sugar, baking powder and salt. Add milk, oil, and vanilla and egg yolks.

Beat with mixer 3 minutes, scrape sides and bottom often. Stir egg whites into batter until well blended about one minute. Pour into greased cake pans that have been floured.

Bake at 350 degrees for 25-30 minutes until cake springs back when touched. Cool for 15 minutes then remove from pan.

Linda Esh
Ronks, PA

xxx

Cinnamon Flop

2 cups flour
¾ cup sugar
2½ teaspoons baking powder
½ teaspoon salt
¼ cup shortening
1 egg beaten
1 cup milk

Combine dry ingredients and lard mixing until crumbly. Add egg and milk gradually to dry ingredients and beat until thoroughly mixed. Put mixture in square pan. Brush top with melted butter and sprinkle with brown sugar and cinnamon.

THE ATOM WON'T SOLVE OUR ENERGY WOES

It is getting harder and harder to find anyone willing to endorse nuclear power plants as the energy source of the future except, of course, those who profit from such white elephants. And an increasing number of people are having serious doubts about the atomic plants already operating around the country.

The anti-nuclear power forces are growing, and the evidence behind them is becoming increasingly solid. Much of it is being supplied by the nuclear power plants themselves in minor accidents and near-disasters that utility spokesmen have glibly assured the public could never happen.

Consider just a few of those incidents: In June, a pipe carrying radioactive material at the Cordova, Illinois nuclear power plant ruptured, triggering an automatic fire protection system. Some of the water that was sprayed through the plant leaked into the Mississippi River. Said a utility spokesman: "The water in the Mississippi River has a low level of radioactivity, but is not considered hazardous by the Atomic Energy Commission. If someone drank the water, it wouldn't hurt them, aside from the dirt."

In March, an accident at the Hanford Nuclear Power Reservation in Washington sent 2,500 gallons of highly radioactive liquid leaking into the ground. Residents were

told not to worry, since "the ground will absorb the wastes before they can reach the water supply." The previous year 115,000 gallons of radioactive wastes spilled at the Hanford Station – the worst on record in the United States.

In another incident, construction on a nuclear power plant in Virginia was halted after environmentalists pointed out it was being built on a geological fault – a prime earthquake site. But the AEC said that manpower restrictions had hindered its efforst to do extensive research on the site before construction began.

Most disturbing, one might guess, is what the public is not being told. News of an accident at the San Onofre Nuclear Power Plant in California was withheld by both the Southern California Edison Company, which operates the facility, and the Atomic Energy Commission – until it was revealed by the press. Through a series of mistakes, the emergency core cooling system and the plant sustained considerable damage, putting it out of service until at least early next year. The AEC excused its action in withholding the information by saying that the accident was not serious and posed no hazard to the public.

In fact, according to a study done by the Nader organization, approximately 850 abnormal occurrences were reported to the AEC between January 1972 and May 1973 by the nation's 30 operating nuclear power plants.

Abnormal incidents such as leaks of radioactive material seem to be occurring at a much greater rate than anyone would like to admit.

And what is the attitude of industry toward the leaks? Apparently some of those whose job is to voice industry opinion think the whole thing is pretty funny.

In its May 1974 issue, "Industrial Research" magazine awarded the AEC its "Butterfingers-of-the-Month" award for the leak of 2,500 gallons of radioactive waste from a tank at Richland, Washington.

Then there was another 2,000 gallon leak at Richland, followed by the announcement that plutonium from a weapons laboratory in Ohio was found in the mud of a canal near Miamisburg, Ohio.

It won't be funny, though, if radioactive wastes seep into drinking water and people in huge areas of the country suddenly find themselves sitting on top of a radioactive pool of water that they're expected to drink.

Newspapers recently were filled with the news that the French had resumed atmospheric testing of nuclear bombs. Official reaction was grim and many were quick to condemn the French for spreading nuclear pollution.

But when it comes to nuclear plant pollution here at home, the critics are strangely silent.

The only way out of this dilemma is to stop building the plants until there is a fail-safe method of insuring full safety, something that is not likely now or ever. A concentrated effort must be made to find alternate sources of power that are non-polluting, something nuclear power is not and will never be.

The demand for electricity reportedly declined last winter for the first time since the Depression, a trend some experts see continuing. This lull in demand makes now the ideal time to search for alternate sources of power before it is too late.

(Editor's Note: The opinions appearing in "Organic Living" are those of its author, Robert Rodale, an independent columnist. Rodale's comments do not necessarily reflect the thinking of the Lancaster Farming editor or anyone else on the Lancaster Farming staff.)

ASCS Prepares For Committee Elections

Farmers are being asked to nominate candidates of their choice to be on the ASC Community Committee ballot, says Fred G. Seldomridge, Chairman of the Lancaster County ASC Committee.

The ASC Community Committee election will be conducted from Nov. 22 to Dec. 2 by mail ballot. For administrative purposes the number of Communities in Lancaster County has been reduced from 16 to 15. These Communities are: No. 1, Conoy, West Donegal and Mt. Joy townships; No. 2, East Donegal and West Hempfield Townships; No. 3, Rapho Township; No. 4, Penn, Warwick and Elizabeth townships; No. 5, East Cocalico, West Cocalico, Brecknock and Clay townships; No. 6, Caernarvon, East Earl and Earl townships; No. 7, Ephrata, West Earl and Upper Leacock townships; 8, Salisbury and Leacock townships; No. 9, East Lampeter, West Lampeter and Lancaster townships; No. 10, Manheim and East Hempfield townships; No. 11, Manor, Conestoga and Pequea townships; No. 12, Eden, Bart and Sadsbury townships; No. 13, Strasburg and Paradise townships; No. 14, Martic, Providence, Drumore and East Drumore townships; and No. 15, Fulton, Little Britain and Colerain townships.

ASC Committees are responsible for managing government farm programs on the local level. To meet the needs of individual producers, ASC Committee members must be concerned and responsible individuals. County farmers have the opportunity to nominate persons they feel would best serve the farm community. Farmers will soon receive petition forms by mail and may begin submitting them to the county ASCS office on October 3.

A few basic considerations should be kept in mind when circulating petitions, Mr. Seldomridge said. In order to be valid, petitions must be limited to one nominee each, must include written certification that the nominee is willing to serve if elected, must be signed by at least three eligible voters in the ASC Community, and must be received in the county ASCS office no later than October 29.

A farmer may circulate or sign nominating petitions for as many candidates as he chooses. Anyone wishing to nominate a farmer for the ASC Committee election may contact the ASCS office for full details, including eligibility requirements for officeholders.

Farmer nominations of candidates for the upcoming ASC Committee elections are very important. Farmers should petition for and elect those individuals they feel would do a good job as ASC Committeemen. The election of concerned farmers to positions on ASC committees is necessary for good administration of farm programs.

Mr. Seldomridge, further explained that the county ASCS office welcomes all valid petitions. The opportunity to nominate, vote, and be elected to office is guaranteed to all farmers regardless of race, religion, sex, color, or national origin.

Thought For Food

Vanilla Peach Pudding

Drain 1 can (1 pound, 13 ounces) sliced canned peaches, reserving 1 cup of the syrup and mix it with the peaches, 1 teaspoon lemon rind, ¼ teaspoon salt, 1 teaspoon pure vanilla extract, and 1 tablespoon quick-cooking tapioca. Turn into a 1½ quart casserole or baking dish. Dot with the 1 tablespoon butter or margarine. Soften ¼ cup butter or margarine onto which gradually blend ¼ cup sugar. Beat in 1 egg. Sift together 1½ cups sifted all-purpose flour, 2½ teaspoons double-acting baking powder, and ¾ teaspoons salt. Add alternately with ½ cup milk mixed with 1 teaspoon pure vanilla extract. Beat batter about 20 strokes. Spread uniformly over peaches. Bake in a preheated moderate oven (350°F.) 1 hour and 15 minutes or until browned. Serve hot with whipped cream if desired. Yields six servings.

Ag Production Adequate To 1985, Economist Says

American agriculture up to 1985 will likely have the capacity for a little excess production but not always enough to meet occasional surges of demand for exports, declared Dr. George E. Brandow of The Pennsylvania State University during the annual meeting of the American Agricultural Economics Association recently at College Station, Texas. Dr. Brandow said the current U.S. food situation is a severe instance of abnormal export demand and is being extended by serious drought.

His views for a long-range outlook were based on projections of food production and use in 1985 for two different situations. In the first, long-established trends would dominate the outlook rather than recent exceptions such as world-wide drought. The second situation would hinge on possible growth of export demand beyond unusual levels. Either situation, he said, could be combined with restrictions on agriculture's capacity to meet demands due to shortages of fertilizer and other supplies or because of severe environmental measures.

If exports should go back to pre-1972 trends, Brandow reported, production could keep up with growth of the total market at prices no higher in relation to other consumer prices than were usual prior to 1972. A small surplus would be likely in the usual case, the study showed, but surges of export demand such as experienced in 1966 and 1972-73 could create temporary shortages.

Expansion of farm output would be speeded up if high demand and prices created a strong incentive, he pointed out. His figures for that situation showed a 25 million acre increase over the 325 million acres of harvested cropland otherwise to be expected. The figures also showed slightly higher average yields per acre despite the lower productivity of new cropland. Total grain production would be boosted by 12 percent and export availability of grains by two-thirds if high prices prevailed.

The United States probably would be able to provide about as much food aid to poor countries as at the peak of past aid even without the stimulus of high prices, according to the study. Crop prices that remained as favorable to farmers as in 1972-73 might generate four times as much food for aid, a representative projection showed. Even that volume of food could not itself long sustain all the less developed countries, Brandow concuded, because it would be absorbed by three year's population growth in the late 1980's if present birthrates continued.

Increased production of food for aid could be encouraged if the public wanted it, he said, by long-term guarantees of favorable returns to producers and cheap credit for land development. Dr. Brandow emphasized the need to take uncertainty into account in forming food and agricultural policy and argued for flexibility capable of dealing with events as they unfold. He pointed to stabilization of market supplies as a leading problem but warned that the task would be more difficult than formerly thought.

Get Rich Quick

A few people know how to get rich quick — they're able to determine when a piece of junk turns into an antique.

Farm/City Cochairmen Announced

State Farm-City Council Chairman, Claude Myers, announced the appointment of co-chairmen William Howerter, Kempton RD2, and Leon Kirkhoff, RD2, Bernville as co-chairmen of the Berks County Farm-City Council. In making the announcement, Myers said the co-chairmen will coordinate Farm-City Week activities in the county, which will be observed throughout the state November 22-28, 1974. This year's Farm-City theme is "Know Your Neighbor and Work Together."

One of the major objectives of Farm-City Week, Myers said, is to develop a better understanding between our urban and rural people. These two groups are interdependent. They need to have a better knowledge of each other's role in today's society. And, they have an important role for improving the quality of life in the Commonwealth, Myers said.

The Chairman said that Farm-City Week has been observed in Pennsylvania for over a decade. Annually, it's sponsored by statewide organizations, federal and state agencies, and local groups. Kiwanis International promotes Farm-City Week through the nation. Schools, civic and service organizations, the business community and individuals are urged to participate.

York Couple Win Grange Award

Mr. and Mrs. Glenn W. Sterner of Hanover, York County, have been named the Pennsylvania State Grange's young married couple of the year. They were selected in a competition at the annual Grange conference for young married couples which was held at Edgewater Acres near Huntingdon.

They will serve for the 1974-75 year in Pennsylvania, and will compete for the national title at the annual convention of the National Grange in Columbus, Ohio, in November 1975.

Mr. and Mrs. Sterner succeed Mr. and Mrs. Alfred Stewart of West Springfield, Erie county, the state Grange's young married couple for 1973-74.

The Sterners, who reside at 39 Centennial Ave. in Hanover, have been married for eight years and have two sons, six-year-old Patrick and two-year-old Jonathan. They are members of Trinity United Church of Christ in Hanover where Glenn is a deacon.

The Sterners have been active in the Grange since 1966. Glenn is now serving as overseer of Gideon Grange at Hanover and of the York-Adams County Pomona Grange. He also has served as master, assistant steward and gatekeeper of Gideon Grange, and gatekeeper and steward of the Pomona Grange.

His wife, Peggy Ann, is the lecturer (program chairman) and past gatekeeper of the Gideon Grange.

What 4-H Means To Me

Written by 4-Hers from surrounding counties . .

by Scott Heisey
Lancaster County

4-H involves many different aspects and characteristics in the life of a teen. These include responsibility, social and educational activities, and friendships. These things have meant a lot to me.

The first thing I learned in 4-H was responsibility. At first, responsibility meant doing chores before going to school. Then it encompassed things like financial management, business practices, and meeting due dates. For me, responsibility eventually graduated to leadership. Teaching and guiding younger 4-H'ers in Teen Leadership was a truly valuable experience in itself. Learning to be responsible was hard work, but it is undoubtly worthwhile.

However, 4-H was not all work. I had many opportunities to go places to represent 4-H. Two of the most memorable occasions were going to Maine on a 4-H Exchange Trip and Washington, D.C., for a conference on Leadership and Careers in Agribusiness. In 1974, I had the privilege to exhibit at the State Farm Show. I also enjoyed going to county fairs with my projects. These and many other activities gave me a chance to travel, learn, win prizes, and make friends.

Perhaps the friendships that I gained mean the most to me as a 4-H'er. I now know many people that I would have never met outside of 4-H. I am sure that some of these friendships will past permanently. Sharing common interests through 4-H is invaluable. Probably the importance of making friends will not become evident until long after I leave 4-H.

In short, being involved in 4-H has meant both work and fun - and all of my experiences have been rewarding!

Scott is the son of Mr. and Mrs. J. Warren Heisey, RD1, Elizabethtown.

By Ann L. Hoover
York County

As I approach my nineteenth birthday and my remaining weeks as a 4-H member, I often look over my personal 4-H clover which was grown and blossomed throughout the past ten years. My life has certainly been enriched by many rewarding experiences in the 4-H program.

4-H helped me to develop a desire to meet people, thus overcoming the extreme shyness I experienced as a youngster. Through 4-H I had the opportunity to become acquainted with individuals from various walks of life, and I gained lasting friendships with young people throughout Pennsylvania and several other states. I am especially interested in all phases of public relations relative to 4-H.

The unique experiences available in 4-H have added a special touch to my life. I do not believe these fulfilling opportunities are offered by other institutions. The people I met and the speakers I heard have had a profound influence on my life. At various 4-H events I attended, speakers such as Olympic Champion Bob Richards, Marilyn Van Derbur, a former Miss America, and Louis Strong, President of the NRECA in 1972, have given me inspirational thoughts to ponder. The sentiments expressed through speeches, conversation, and personal correspondence have encouraged me to meet challenges and set high goals. Many of my dreams have now become realities.

I constantly apply the 4-H motto, "TO MAKE THE BEST BETTER" not only to 4-H endeavors, but also to my life in general, thus broadening the scope of my interests, increasing my leadership ability, and striving to make the most of my life.

I want to share a thought which Marilyn Van Derbur included in a personal letter to me. This thought is of value to many of us. She wrote, "You are only beginning a life of accomplishment and fulfillment. Continue to reach. Aim high. Do. BE. Continue to have a goal and a plan...and to make your best better!"

By Rick Krall
Lebanon County

When 4-H is mentioned to someone, usually the first thing they think of is rural youth organization in which 4-H'ers carry farm projects. However, 4-H is a national organization for both rural and urban youth, and offers every project imaginable. To me, 4-H means even more. To me, 4-H means learning and people.

4-H has provided me with an opportunity to become involved in club work. I began 4-H with one dairy animal as a project, persently I own eight dairy animals, and have also completed tractor, automotive, vet science, small engines, and leadership projects. 4-H has encouraged me to learn more about this world and the projects 4-H offers provide a perfect means for learning.

I have served as president of the Cedar Crest 4-H Dairy Club and have also served as chairman of many committees in the dairy club and the Lebanon County Teen Council. The experiences I have had as an active 4-H member are both useful and meaningful. These experiences have taught me how to lead and work with a group. I doubt if I would have the leadership ability I have now were it not for 4-H.

I said 4-H means people. Not only the 4-H'ers in Lebanon County, but also the friends I have made at regional, state, and national 4-H events. Without 4-H I doubt if I would be able to get along with others as well as I do. By attending these events, I have made many new friends and have received many ideas about 4-H in other counties.

I feel that being a 4-H member is a very rewarding experience. I strongly encourage all youth to try 4-H club work. Rick is the son of Mr. and Mrs. Arthur Krall, RD1, Lebanon.

by
Janet Hutchison
Chester County Extension

Janet Hutchison, daughter of Mr. and Mrs. James M. Hutchison, West Grove, Pa., and a member of the Oxford Agricultural Community Club, has been chosen Chester County's Outstanding Girl for 1974. During her eight years in 4-H, Janet has completed thirty-five units in fifteen project areas, receiving Blue Merit Ribbons in almost all units and twenty-two Grand and Reserve Champion Ribbons.

Although Entomology and Leadership are her most important projects, Flowers and Vegetables are becoming more prominent each year. Having worked in Entomology and exhibited her collection on both the local, county, and state levels for three years, Janet decided to try stimulating interest in the study of insects in the county. Three years ago she became a Teen Leader in Entomology in her club and today is the Entomology Advisor to six clubs. In most instances Janet has traveled to the member's home to give individual help She also is a Teen Leader in Strawberries, Flowers, and Vegetables.

In 1973 and 1974, Janet was chosen to give her Entomology Demonstration at 4-H State Days. Competing in the Animal Science Category during Achievement Days at Penn State, She won a Blue Ribbon for her presentation, "Mounting Your Catch."

A county winner in Safety and Entomology in the National Awards Program last year, Janet bettered her record by being named Keystone Winner in Entomology, Citizenship, and Outstanding Girl for 1974.

4-H offers many opportunities for growth in Leadership and Janet, like many others, has responded to the challenges. Having held every office at the local club level at some time during her 4-H years, Janet was elected County Council President in the spring of 1974. Recently she was appointed to the County 4-H Advisory Committee.

As County President, Janet is vitally involved in all policy making decisions and the planning and direction of county activities: County Round-Up, Spring Fair, Poster Contest, County Council Swim Party and Picnic, and the Achievement Dinner. At each, she presided as Mistress of Ceremonies. She also helped plan four Chester County Teen week-ends and two Multi-County Teen Retreats. In addition to general participation, Janet acted as Song Leader, Game Leader, Inspirational Chairman, or Mistress of Ceremonies.

4-H'ers are constantly engaged in activities that stress "learning by doing," and Janet was fortunate in being selected to attend various scheduled programs: Club Congress and Leadership School, both at Penn State; Camp Kanesatake, which gave training for activities in crafts, study of nature, leading of songs, games, and calling of square dances; PAFC at Shippensburg, a week's course dealing with business procedures and principles, but applied mainly to cooperatives; Capitol Days at Harrisburg and Citizenship Short Course in Washington, both stressing citizenship involvement.

Eager to interest other young people in 4-H and to acquaint the public with the many opportunities for fun, learning, new experiences, and new friends that 4-H offers, Janet has become involved in the newly developed slide program explaining 4-H, in which a County Council member gives a talk and shows slides on 4-H activities. Last winter Janet presented such a program to the Avon-Grove Lions and is scheduled to speak to the Kennett Square Rotarians this fall. Any organization desiring to know more about 4-H work is asked to contact 696-3500 for information.

In addition to her 4-H work, Janet is a Senior Scout, active in school, church, and community affairs, attended National Red Cross Aquatic School, worked as a volunteer instructor in the Red Cross Learn-to-Swim Program, and was named a Letter of Commendation recipient in the National Merit Scholarship Testing Program.

By
Mrs. Harris Horn
Thomasville 4-H Club

In being a 4-H leader, I shall try to share with you a few ideas, or thoughts, that seem important to me. I feel, by using the word Love, is the greatest way to begin! Loving youth, and giving of my time to them is one of the happiest rewards of my life. Through them, I am hoping to build a nation of love and devotion for our generations to follow. As a leader, and parent it is up to me to set an example.

4-H means working and sharing together. This is the true basis for happiness in life. Even in the beginning of man, work was necessary for the survival of life. So it is today, in our world of automation and frustrations. How relaxing it is, to work in the soil, or with plants and flowers. Just to keep our hands busy, even with sewing or by doing a craft of some kind. Project work is what gives body and life and character to 4-H club work. I am aware, it is the objective of a leader, to test the skills, the patience, and the responsibility of a 4-H member to help find their potential. No member will get the most out of club work who doesn't have to complete at least one project.

I do believe in the age old saying "all work and no play makes Jack a dull boy," so I do feel that laughter and fun is essential for the 4-H members. Singing and playing together gives young people the right to distinction and self-assurance.

In our community service work with leaders and parents, I feel in reaching out our hands of helpfulness to others, we experience spiritual growth. The Rural Life Service - on Sunday a year worshiping together and our Friendship circle, which climaxes the end of the clubs year together. These are some of the ceremonies that develop something of the true, the beautiful, and the Divine being with us. Living - Working - Sharing - Worshiping with 4-H members, parents, leaders and extension personel - these are the precious moments for today and tomorrow and the years to come. Enjoy them for larger service to the community and to our country - America, - if we all strive, make the best Better, we will always have, America!

What Do You Know About 4-H

by Anne Hinkel,
Assistant Home Eco.

Lancaster County boasts the largest 4-H enrollment in Pennsylvania. There are almost 3500 4-H members and 300 leaders within the county. What do you know - or don't know about 4-H? Here's a quick quiz to test your knowledge and also give you more information about the 4-H Club Program.

1. 4-H members range in age from 8 to 19. (True)

2. Most 4-H members live on farms. (False. One-fourth of the 4-H members live on farms; one-fourth come from urban areas; and one-half come from small towns and rural non-farm areas.)

3. 4-H members only work on specific club projects. (False. 4-H'ers give talks and demonstrations, do community service projects, put up displays, show their projects in competition, all as ways to improve themselves and their community.)

4. 4-H members can choose from about 150 projects in Pennsylvania. (True. Some projects carried by Lancaster County 4-H'ers are: photography, clothing, handyman, beef, dairy, vegetable gardening, horses and leadership.)

5. A 4-H Club can be as small as several young people meeting in a parent's home. (True.)

6. All 4-H groups must have a fund-raising program in order to pay for membership dues. (False. There are no dues in 4-H. Project booklets and educational leaflets are free. Some clubs do have money-raising projects for special trips and community services.)

7. The 4 "H"s stand for head, heart, health, and hands. (True. 4-H'ers pledge their head to clearer thinking, their heart to greater loyalty, their hands to larger service, and the health to better living for their clubs, communities, country and world.)

8. In order to start a 4-H Club, a leader must be willing to have meetings every week for at least nine months. (False. Most projects are a series of six meetings which can be scheduled by the leader at any time during the year. Many clubs meet during the summer; some meet once a month and during the winter.)

9. Over 70 foreign countries have set up youth

(Continued on Page 49)

What Do You Know

(Continued from Page 48)

groups patterned after 4-H club work. (True. Total international 4-H membership is 5 million.)

10. The Cooperative Extension Service with 4-H as its youth program is a part of the College of Agriculture of the Pennsylvania State University. (True.)

Do you still have questions about 4-H? Contact the Lancaster County Extension Service, Room 1, Farm and Home Center, Lancaster.

Thomasville 4-H Club

The Thomasville 4-H Club met on September 24, 1974 at the 4-H Center. Pledges were led by Tammy Barnhart and Todd Sterner. Songs were led by Jeff Roth, Nancy Kulynych and Christine Kulynych. Roll call was answered by the member's favorite kind of 4-H cookie.

Tim Eisenhart reported on his trip to Massachusetts where the 4-H cookies are made.

New officers for the club were elected. They are: President - Gary Welsh, Vice-President - Tim Eisenhart, Secretary - Jonathan Myers, Ass't Secretary - Katherine Uhl, Treasurer - Bonnie Wire, Ass't Treasurer - Jack Parr, News Reporter - Paul Myers 111, Ass't News Reporter - Carl Anderson 111, Song Leader - Tammy Barnhart, Ass't Song Leader - Joanne Haskins, Game Leader - Christine Kulynych, Ass't. Game Leader - Tommy Welsh.

Members performing in the talent show were Lori Hoke, Tina Barnhart, Jonathan Myers, Joanne Haskins, Ned Rentzel, Bonnie Wire and Katherine Uhl.

The club will have an exhibit for National 4-H Club Week Oct. 6 to 12 at the Lincolnway office of the Southern Pennsylvania National Bank. Members will be selling cookies September 30 to November 15. Co-chairmen will be Tim Eisenhart and Christine Kulynych.

York Co. Hort Club

The York County 4-H Horticulture Club held their September meeting recently at the York County 4-H Center at 7:30 p.m. The club had a short business meeting including discussion on flower arrangements for the York County 4-H Achievement Night in October, upcoming 4-H Horticulture programs, and problems in the county dealing with Horticulture.

The program followed which was conducted by Miss Christi Shermeyer, a Davidsburg 4-H member, on how to make and properly take care of terrariums. All the people in attendance found the program to be interesting and educational. The next Horticulture meeting will be on October 21, 1974 at the 4-H Center and the program will be "How to get your garden ready for Winter and "Making dried flower arrangements."

Chester Co. 4-Hers Receive State Awards

Five Chester County youths, who have compiled outstanding records in 4-H work, today were named state contest winners in the 1974 4-H National Awards program.

They are Holly Scheib, 17, of RD2, Phoenixville, winner in agriculture; Joan Liesau, 18, of RD1, Spring City, winner in sheep; Elizabeth Ekdahl, 18, of 751 West Strasburg Road, West Chester, winner in photography; Tina Kulp, 17, of 1096 Spiece Road, Pottstown, a nominee for an Edwin T. Meredith Scholarship; and Sarah Winstock, 17, of 1234 Pothouse Road, Phoenixville, winner in dairy foods.

Holly, Elizabeth, and Sarah will receive expense-paid trips to the National 4-H Congress in Chicago, December 1-5. Joan is recipient of a $50 U.S. Savings Bond and will be eligible to attend the national conference. All five will compete for awards at the national level.

Dr. Robert B. Lewis, leadership development specialist, 4-H Youth, at The Pennsylvania State University, who announced the award selections, said they were judged on the basis of project work, leadership ability, and participation in county and state activities.

The winners were picked from among the 215,000 4-H members who annually take part in the Extension Service youth education program.

Holly Scheib
Agriculture

The daughter of Mr. and Mrs. Clyde Scheib, Holly is a freshman at Kutztown State College. She has been a 4-H member eight years.

A member of the Tri-Community 4-H Club, Holly served as president, vice president, secretary, news reporter, song leader, and game leader. She also was secretary of the Chester County 4-H Council and assisted with club activities and events as a teen leader the past three years.

The commodity marketing contest winner completed projects in dairy, sheep, goat, clothing, gardening, teen leadership, bicycle, tractor maintenance, handyman, nutrition, veterinary science, and entomology.

Active in local 4-H events, she participated in the roundup, dress revue, picnic, and officers training.

Holly also took part in the District and State 4-H Dairy Show, Regional 4-H Teen Leaders Retreat, Regional 4-H Demonstration Day, Pennsylvania 4-H Leadership Congress, State 4-H Days, State 4-H Leader Training Camp, Pennsylvania Association of Farmer Cooperatives Summer Youth Institute, and Northeast Regional Teen Leaders Conference.

She was awarded a trip to the American Institute of Cooperation and has won numerous local fitting and showmanship ribbons in her dairy work.

Commenting on the values of the educational program, Holly said: "4-H has given me a set of values to live by and has helped me to know the meaning of responsibility."

Joan Liesau
Sheep

The daughter of Mr. and Mrs. Eugene F. Liesau, Joan is a freshman at the Berks Campus of The Pennsylvania State University. She has been a 4-H member 10 years.

A member of the Tri-Community 4-H Club, she served as president, secretary, song leader, and game leader. She also was a teen leader the past five years.

The state contest winner completed projects in sheep, bicycle, teen leadership, flowers, gardening, geology, forestry, wildlife - conservation, photography, and rabbits.

Locally, she participated in the picnic, roundup, officers training, day camp, and one-day cooperative institute.

She also took part in the Regional 4-H Demonstration Day, Regional 4-H Sheep Show, State 4-H Leadership Camp, Pennsylvania 4-H Leadership Congress, Pennsylvania Association of Farmer Cooperatives Summer Youth Institute, and the Northeast Regional Teen Leaders Conference.

Joan was selected as the Eastern States Hampshire Sheep Queen and the Bucks-Montgomery County Wool Queen.

"4-H has encouraged me to develop leadership skills and has given me a set of values," Joan said.

Libby Ekdahl
Photography

The daughter of Mr. and Mrs. George Ekdahl, Elizabeth is a sophomore at Michigan State University. She has been a 4-H member four years.

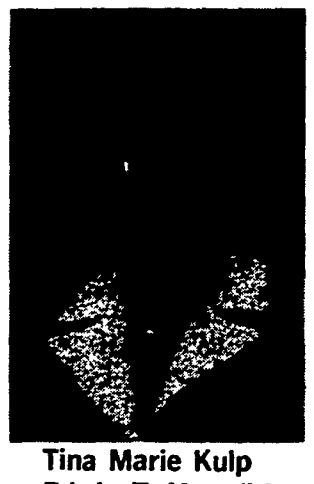
A member of the Northern Chester County 4-H Horse Club and the Marshatton 4-H Community Club, she served as vice president and news reporter and was secretary of the Chester County 4-H Council. She also served as a teen leader the past year.

The state photography contest winner completed projects in several units of photography, dog care and training, horse, veterinary science, health, and teen leadership.

She took part in the County 4-H Roundup, Regional 4-H Teen Leaders Retreat, State 4-H Leader Training Camp, State 4-H Days, State 4-H Horse Show, Pennsylvania Association of Farmer Cooperatives Summer Youth Institute, and the American Institute of Cooperation.

Elizabeth received the "I Dare You" 4-H Award; was the Outstanding Girl Leader at the PAFC Summer Youth Institute; and won the Outstanding Achievement Award in Junior 4-H Club Work.

"4-H participation has given me an opportunity to sample top-notch leadership and take part in various communications exercises," she said.



Tina Marie Kulp
Edwin T. Meredith Scholarship

The daughter of Mr. and Mrs. Harold R. Kulp, Tina is a freshman at Elizabethtown College. She has been a 4-H member eight years.

A member of the Tri-Community 4-H Club, she served a historian, secretary, news reporter, song leader, and game leader. She also assisted as a teen leader the past two years.

The scholarship nominee completed projects in dairy, clothing, foods and nutrition, wildlife conservation, entomology, teen leadership, bicycle, and phycical fitness.

Locally, Tina participated in the dress revue, roundup, picnic, achievement banquet, and agri-business institute.

She also took part in the Regional 4-H Teen Leaders Retreat, Regional and State 4-H Dairy Shows, Pennsylvania 4-H Leadership Congress, State 4-H Days, Pennsylvania Association of Farmer Cooperative Summer Youth Institute, and the National and Eastern States 4-H Poultry Judging Contests.

She was a member of the state champion poultry and entomology 4-H judging teams, and showed the grand champion at the All-American Dairy Show.

"4-H has assisted me in gaining poise and making lasting friends," she said.

Sarah Weinstock
Dairy Foods

The daughter of Dr. and Mrs. Joseph Weinstock, Sarah is a senior at Phoenixville Area Senior High School. She has been a 4-H member eight years.

A member of the Tri-Community 4-H Club and the Che-Del-Be 4-H Dairy Goat Club, she served as president, vice president, secretary, treasurer, news reporter, game leader, and song leader. She also was vice president of the Chester County 4-H Council and served as a teen leader.

The state dairy foods contest winner completed projects in dairy goats, diary foods, teen leadership, corn, veterinary science, babysitting, and pet care.

In Chester County, she participated in the 4-H teen retreat, poster contest, picnic, roundup, and fair.

She also took part in the Regional 4-H Teen Leaders Retreat, District 4-H Dairy Show, Regional 4-H Demonstration Day, Pennsylvania Association of Farmer Cooperatives Summer Youth Institute, State 4-H Days, Pennsylvania 4-H Leadership Congress, State 4-H Dairy Show, State 4-H Capital Days, State Farm Show, and Citizenship Short Course.

She presented the state winning foods demonstration at State 4-H Days and is a board member of the Chester County Mini-Service Cooperative.

"Through 4-H work I have gained a better knowledge of people and how to relate to them," Sarah said.

They are five of 40 Commonwealth 4-H members being selected as state winners in the various project categories.

York County

NATIONAL 4-H WEEK
OCTOBER 6 thru 12, 1974
Monday, October 7, 1974
York County 4-H Baby Beef Club, 7:30 p.m., 4-H Center

Tuesday, October 8
Shrewsbury 4-H Club, 7:00 p.m., School House Building

Wednesday, October 9
Horse-N-Round 4-H Horse Club, 7:00 p.m., Yorkanna J. C. Building
Leader Heights 4-H Club, 7:30 p.m., Leader Heights Community Bldg.

Thursday, October 10
Stoverstown 4-H Club, 6:30 p.m., 4-H Center
York County 4-H Achievement Night, 7:30 p.m., 4-H Center

Among 4-H'ers, the most popular projects and activities include - agriculture, clothing, consumer education, food-nutrition, and health.

As bicycling becomes more popular bicycle safety becomes even more important. Helping spread the word on proper bicycle safety habits and other safety do's and don't's to other youths and adults are 4-H'ers enrolled in the national 4-H bicycle program and the national 4-H safety program sponsored by The Goodyear Tire & Rubber Company and General Motors, respectively.

Chester 4-H Goat Show

Two of the top three honors at the Chester County 4-H Goat Show were captured by Richard Stoneback, Oxford. Stoneback exhibited the grand champion animal while being judged grand champion showman. He is the son of Dr. and Mrs. Richard Stoneback.

Sarah Weinstock, Phoenixville, won the other top honor by being named grand chmpion fitter for the show. She also exhibited the reserve grand champion animal. Her brothers Michael and Joshua were named champion junior and first year fitter respectively. Michael also exhibited the junior champion goat while his sister Rachel, exhibited the reserve junior champin goat.

Other results of the show included: Junior Kid Class (Goats 6 months of age and younger) blue ribbons for superior quality animals were awarded to Sarah Weinstock and Richard Stoneback. Red ribbons designating excellent quality animals were presented to Alison Scheib, Phoenixville and Mark Meek, Boothwyn.

Richard Stoneback (left), Oxford, is receiving the rosette for exhibiting the grand champion doe at the Chester County 4-H Goat Show from Mrs. Margaret Jacob, 4-H Club Leader. Richard also was named grand champion showman.

In the Senior Kid Class (goats 6 months to 1 year old) blue ribbons were awarded to Richard Stoneback, Jonathan, Michael, and Joshua Weinstock. In the yearling class (animals over 1 year old but never freshened) blue ribbons were awarded to Rachel and Sarah Weinstock while red ribbons went to Richard Stoneback and Richard Cathcart, Glen Riddle.

Blue ribbons were won by Edgar and Janet Latshaw, Spring City in Milkers under 2 year old class. In the Milkers 2 to 4 year old class, blue ribbons were presented to Richard Stoneback, Alison Scheib, while red ribbons were presented to Rachel and Sarah Weinstock. Blue ribbons were awarded to Richard Stoneback and Sarah Weinstock in the Milkers 4 years old and older class.

Results in the fitting class, based on members' ability to prepare goats for show: blue ribbons for superior ability were presented to Sarah, Rachel, Jonathan, Michael, and Joshua Weinstock, Janet Latshaw, Alison Scheib, Ricky Cathcart, and Mark Meek. A red ribbon for excellent ability was awarded to Edgar Latshaw.

National 4-H Congress will be the scene for the unveiling of a special photography exhibition. The 1st Annual National 4-H Photography Exhibition will be on display in Chicago throughout the week and will feature photos taken by 4-H members nationwide. The annual exhibition is sponsored by Eastman Kodak Company, the Cooperative Extension Service, National 4-H Foundation and the National 4-H Service Committee. Photos were selected in county and state exhibitions earlier this summer.

In the showmanship class, based on the members' ability to present the goat to the judge, blue ribbons were won by Richard Stoneback and Sarah and Rachel Weinstock. Red ribbons were presented to Edgar and Janet Latshaw, Alison Scheib, Ricky Cathcart, Mark Meek and Joshua, Michael and Jonathan Weinstock.

The Chester County 4-H Goat Show is held annually to evaluate the progress 4-H members make with their goats. This is one of many activities of the Che-Del-Be 4-H Goat Club. In the club, members receive instruction and guidance from Mrs. Margaret Jacob, Pottstown, Dr. Nancy Risser, Glenn Riddle, and Mrs. Joseph Weinstock, Phoenixville, volunteer adult leaders who donate their time to this activity.

4-H is a youth organization sponsored by the Chester County Cooperative Extension Service and The Pennsylvania State University. 4-H is for all youth regardless of race, color, creed, or national origin. Further information about 4-H may be secured by calling 696-3500.

The week of October 6-12, 1974, is National 4-H Week. This year's theme is "We Can Make It Happen".

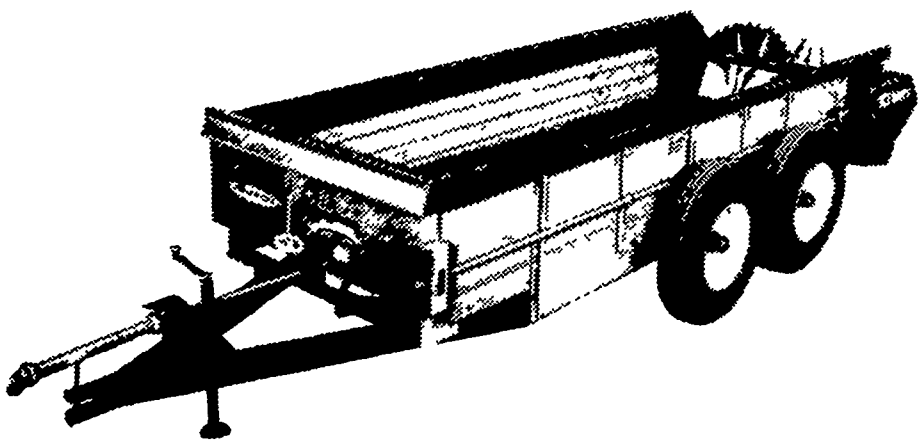
New Idea's Manure Spreaders

Introducing New Idea's Diamond Anniversary 10-ton spreader.



Built bigger than ever to save you time.

75 years after New Idea invented the first successful manure spreader, they bring out their biggest heavyweight ever. A super heavyweight! 10 tons big. 365-bushel capacity. Made with all the quality you've come to expect from New Idea.

This new heavyweight is built big to save you time. And it's built tough too. The extra heavy-duty conveyor chain is backed by a full 2-year warranty. And, this spreader not only has a Belleville spring-type slip clutch that protects the power train —it also features an exclusive "Conveyor Overload Protector System." Available in single or double beater models, with optional "sloppy manure" handling extras such as the hydraulic endgate or pan attachment.

Stop by and check out New Idea's Diamond Anniversary Spreader. Figure out how much time it'll save you. Maybe now's the time to trade up to a New Idea 10-ton manure spreader.

4-H Vets Get Involved

Despite tremendous pressures for their time and talent, veterinarians still take time to participate in community affairs, such as the 4-H Veterinary Science Program, a survey indicates.

The National 4-H Veterinary Science Program -- conducted by the Cooperative Extension Service and Upjohn Company, is now in its seventh year. Almost 70,000 youth in some 1,400 counties throughout the U.S. take part.

Enrollment in the program increased about 14 percent last year, and 4-H officials point out that the Veterinary Science Program is one of the fastest growing and most popular programs in 4-H today.

"Much credit for the success of the National 4-H Veterinary Science Program is due veterinarians and veterinary medical associations," says Norman C. Mindrum, director of the National 4-H Service Committee, in Chicago. "Their leadership and professional assistance are very much appreciated."

The extent to which veterinarians are involved was revealed by a survey conducted by the National 4-H Service Committee.

Kids like animals and they get the opportunity to have fun with them while learning about their care and feeding through two 4-H programs. In the national 4-H dog care and training program, sponsored by Purina Dog Foods Groups, Ralston Purina Company, youths learn all about caring for their canine friends. Meanwhile, 4-H'ers who want to learn more about animal care and health can do so through the national 4-H veterinary science program, sponsored by The Upjohn Company.

373 Are Involved In 4-H

According to the survey, 373 veterinarians are currently involved in a 4-H program, with 293 of them participating directly in the 4-H Veterinary Science Program. Of the 373 veterinarians, 234 serve as 4-H leaders and 179 are parents of 4-H members.

Significantly, 72 other veterinarians indicated on their questionnaires that they are interested in becoming involved in the National 4-H Veterinary Science Program. They are being contacted by their state 4-H offices.

4-H Members Have Fun, Learn Lots

In the Veterinary Science Course, 4-H'ers gain an insight into viruses -- including the one which produces rabies. They learn how disease in spread, the importance of vaccination and how internal and external parasites can affect their pets and livestock.

The program appeals to 4-H youth whether they are on a farm, in a rural community, or in the city. It's a natural companion project for 4-H'ers enrolled in livestock or poultry projects.

Life Cycle Study Gives Boost to Oak Leaf Roller Fight

Entomologists at The Pennsylvania State University have determined the life cycle of the oak leaf roller, an insect killing 43 per cent of the oaks in nearly 900,000 acres surveyed in Pennsylvania.

This biology of the oak leaf roller was described September 27 by Dr. Ralph O. Mumma of Penn State at an eastern branch meeting of the Entomological Society of America held in Hershey.

Dr. Mumma indicated that biological information must be available before effective programs to control the oak leaf roller can begin. He said the eggs start hatching in late April and have completed hatching by May 10. The larvae then go through five stages, reaching the final larval stage by about June 15. Then they pass through the pupal stage with adults emerging around July 3.

If spraying with pesticides is to be done to control the oak leaf roller, then the middle of May is the best time to do it, Dr. Mumma pointed out. On the other hand, natural parasites such as flies take a heavy toll of larvae, especially in the latter larval stages during early June.

In the pupal stage, a certain parasitic wasp emerged from 32 per cent of the pupae examined in 1974 field studies. However, the number of parasites can vary year by year. In 1973, the wasps emerged from only 3.4 per cent of the pupae studied.

Thus far, over 1 million acres of oaks have been defoliated, primarily in northcentral Pennsylvania. The oak leaf roller have moved slowly westward, Dr. Mumma said. Defoliation is now centered in Clearfield, Cameron, Elk, and Warren counties.

Egg masses, laid on bark of trees, were found to range from 400 to 2,000 per tree. The average female was found capable of laying two egg masses per year. Eggs remain dormant from July into the following April. As yet there is no effective natural parasite attacking the eggs.

Dr. Mumma quoted Pennsylvania Department of Environmental Resources information describing the oak leaf roller as "the worst forest insect disaster in Pennsylvania during this century." From 1970 to 1972, of nearly 900,000 acres sampled, 43 per cent of the oaks were killed with a lumber stumpage value of 57 million dollars.

Working with Dr. Mumma and associates on Penn State's oak leaf roller project is Dr. Lawrence B. Hendry in chemistry. The two scientists are investigating the use of the female sex attractant, pheromone. With this product they hope to confuse the males so they can not find the females and thus will not mate.

A graduate student from State College, Andrew Zettle, studied the life cycle of the oak leaf roller over a three year period in working toward a doctor of philosophy degree in entomology. The biological studies are supported by Agricultural Experiment Station funds.

Young Named Farm Consultant

Richmond B. Young of Meadville Rd., New Holland, has been named farm consultant for this area by Agway Inc. He recently completed a training course at Agway headquarters in Syracuse. He will work with farmers in Adams, Berks, Chester, Cumberland, Franklin, Lancaster, Lebanon and York counties assisting them with financial planning, accounting, tax matters, estate planning and other management practices.

Agway is a farm supply and food marketing cooperative owned by 113,000 farmers in 12 northeastern states. It operates stores, livestock feed plants, fertilizer manufacturing plants, petroleum plants, and other facilities in nearly 1,000 communities in New England, New York, Pennsylvania, New Jersey, Delaware and Maryland.

Born and raised on a farm in Bradford County, Pa., Young has been associated with Agway since 1952. For several years he was a farm service man with Agway's Petroleum Division and later joined the heating sales and service staff.

Steaks

A thousand pounds of beef on the hoof turns into less than a hundred pounds of sirloin, T-Bone, club and Porterhouse steaks.

American Viewpoints

You shall be governed by laws of your own making, and live a free, and if you will, a sober and industrious people I shall not usurp the right of any, or oppress his person

MELROE BOBCAT
WORLD'S MOST POPULAR SKID STEER LOADER

Before you buy any farm loader, see a Bobcat in action!

It's no accident that Melroe's Bobcat is the world's most popular farm loader. For almost 20 years these powerful little loaders have been taking the backbreaking, time-consuming labor out of dozens of farm jobs. Four Bobcat models, all with 4-wheel drive, pivot turning agility and a big assortment of special job attachments give farmers a wide range of applications and power options. Fitted with the exclusive Bob-Tach, Bobcat becomes a quick-change specialist in scores of indoor-outdoor, year-round jobs. Almost anyone can learn to operate a Bobcat in 15 minutes. And it's economical to maintain. We'd like to show you, right on your farm, how great a compact loader can be. Give us a call. While we're demonstrating, we'll show you how it's easier than ever to own or lease a Bobcat.

4-H Vets

(Continued from Page 51)

But it is just as pertinent for young pet owners and others who do not have farm animal projects.

It's an excellent opportunity for 4-H'ers to explore career opportunities as veterinarians, public health officials, farm managers, or a host of other jobs.

Youth often become very involved in the program and some take on ambitious projects such as assembling animal skeletons, or conducting scientific experiemnts with animals.

Veterinary science activities can include helping with a community rabies clinic, setting up booths at a fair or shopping center to explain their work to the public and prospective members, or touring a meat packing plant.

Some veterinarians hire older 4-H members to help in their kennels and clinics. Some make regular calls with the veterinarians. Numerous youth who enroll in the Veterinary Science program become pre-veterinary students in college.

Last year, some 3,400 4-H members earned medals, Savings Bonds, trips to the National 4-H Congress and $700 scholarships provided by The Upjohn Company, sponsor of the national program.

Indiana Leads in Participation

According to the tabulations of the survey made by the National 4-H Service Committee there are 37 veterinarians in Indiana directly involved in the 4-H Veterinary Science Program. California is next with 25, followed by Wisconsin with 20, Kansas 19 and Illinois 15.

Rounding out the top 10 states are Michigan with 14, Missouri 13, New York and Colorado with 12 each and Minnesota 11.

Veterinarians interested in the National 4-H Veterinary Science program who want to participate would contact their local County Extension Agent in charge of 4-H programs, their State 4-H Leader, or State Extension Veterinarian.

The Upjohn Company, 26 slide sets are being produced.

A 4-H Veterinary Science class meets in the Waukesha Animal Hospital, S.C., in Waukesha, Wisconsin. Their instructor, John E. Kuenzi, DVM, has been working in this 4-H program more than four years. Here, the class uses a giant ophthalmoscope to examine the eyes of a cat. The National 4-H Veterinary Science Program sponsored by The Upjohn Company, enrolls almost 70,000 youth in some 1,400 counties along with 234 veterinarians.

Over 5.3 million boys and girls, between the ages of 9 and 19, are participants in 4-H programs and activities. Supporting their efforts are half a million volunteer adult and teen leaders, the men and women of the Cooperative Extension Service, the National 4-H Service Committee, National 4-H Foundation and numerous private sector donors.

4-H and similar organizations are thriving in 82 countries around the world.

Enrollment in 4-H educational programs increased 31.6% last year as compared with previous years. In addition, the number of locally organized 4-H clubs and groups increased 9.3% while the number of volunteer 4-H leaders jumped 10½% during the same period.

While contining to serve youth of rural America, 4-H is expanding into urban areas as well. And affiliated 4-H members can be found in the nearly all major cities.

Producing ample supplies of meat at reasonable prices is one goal of agriculture today. Assisting in this effort are youths in the national 4-H swine program. Sponsored by Moorman Mfg. Co., 4-H'ers in the program raise their own hogs for market. The youths learn all about livestock production, the care and feeding of their animals and how to successfully market them.

This boy is learning how to take good photos through participation in the national 4-H photography program, sponsored by Eastman Kodak Company. And 4-H'ers in the program have an added incentive this year, as their photos are eligible for participation in the First National 4-H Photography Exhibition, on display at National 4-H Congress. This non-competitive exhibition is sponsored by Kodak, the Cooperative Extension Service, the National 4-H Foundation and National 4-H Service Committee.

Mulligan Stew, the acclaimed 4-H television series on nutrition, has enrolled nearly 4.5 million boys and girls to date across the country, reports the National 4-H Service Committee.

Joining this year in supporting 4-H programs and activities for the first time are: the Insurance Company of North America, donor of the 4-H dairy program; American Fishing Tackle Manufacturers Association, donor of two 4-H fishing scholarships and Daisy Division, Victor Comptometer Corporation, which provides educational aids in the 4-H hunter education program.

Agricultural Occupations Object of National Study

Abilities needed in agricultural occupations are being determined in a national survey, the first of its kind. The study is being carried out largely by college and university teachers and supervisors of agricultural education. Project chairman is Dr. David R. McClay, head of the department of agricultural education at The Pennsylvania State University.

Dr. McClay said there is considerable nationwide need to identify the competencies required by men and women seeking agricultural employment at levels of midmanagement and below. The national study should be especially helpful in high school and college programs leading to employment in agriculture, he added.

Occupations to be identified at midmanagement levels and below are grouped into seven broad teaching areas, Dr. McClay pointed out. These are production, supplies and services, products, forestry, ornamental horticulture, mechanics, and natural resources and environmental protection. Currently about 40 states are involved in the project.

Plans call for the national analysis to be completed by 1976. Such information will aid secondary and post secondary schools in establishing vocational or technical agricultural training programs. The information will enable teacher education departments to up-date their courses. Results of the project will also be useful in preparing competency examinations in agricultural occupations where needed.

Only in recent years has the public, in general, accepted the fact that many occupations make up the working force in agriculture in addition to farmers, Dr. McClay stated. The current national project ties in with committee efforts of a few years ago to encourage the U.S. Bureau of the Census and the Department of Labor to more accurately identify agricultural occupations and persons employed therein in addition to farming.

Teachers of agriculture at the various land-grant universities are working with Dr. McClay on developing survey forms and procedures for carrying out the study among agricultural businesses and industries. On a national scale, personnel at Penn State are conducting phases related to natural resources and environmental protection. The survey has identified 28 occupations involving these two fields.

Consumers' Corner

Supreme Court Decision On Class Actions

As a result of a unanimous Supreme Court decision, consumers will find it more difficult and more expensive to bring class action law suits In a class action, suit can be brought by 1 or more persons (plaintiffs) on behalf of an entire group or class of persons who have the same basic complaint.

In its decision, the court determined that plaintiffs in class action suits must notify — at plaintiffs' expense — all members of the class who can be identified "with reasonable effort," such as through use of a mailing list

The court's reasoning was that under present Federal rules of procedure for class action suits, it is a fundamental requirement that all "identifiable victims" must be notified individually Notification could be costly, since a class action may involve millions of people — for instance, everyone who bought a particular unsafe or defective product or all owners of property damaged by a factory's industrial pollution. Notifying all identifiable parties in the class makes it possible for affected persons to join the class action case actively with their own attorneys or to remove themselves from the case if they prefer not to be bound by the suit's final decision.

Class action suits have made it possible for persons with small individual claims to join froces and to go to court in a situation where a single person's claim would be so small that it would not cover the cost of the suit Such suits have been used in recent years in cases involving consumer, environmental, civil rights and antitrust issues

Pickling

Select only good products to pickle . . . not the leftovers in the garden Also, keep the brine at the correct salt concentration until fermentation is completed

AGWAY

THE TMR FEED PLANT ON WHEELS...

delivers a balanced bite to every cow, every feeding

The Total Mixed Ration (TMR) concept is the best method yet devised for feeding a ration in which every bite is balanced for nutrient content. But thorough mixing is a must. And that's where the Schwartz Mixer Wagon takes over.

It accurately proportions and thoroughly mixes, then transports and distributes nutrients in any prescribed amount and formulation to any spot on your farm. So it's easy to feed the right rations to lactating cows, dry cows, replacement heifers or dairy steers no matter where they're located.

Three models deliver approximately 3 tons, 5 tons or 6 tons of a 35-pound/cubic foot TMR ration. All feature triple augers that tumble the feed and turn it end for end. Optional hydraulic doors and elevator control make it easy to fill bunk or feeder. Optional electric scale assures precise amount of each ingredient. And there are still other options available.

These machines have met the test of on-the-farm performance in the northeast and are built for years of feeding service. If you're considering TMR, be sure to have a good look at them. Call your local Agway to find out what TMR and automated mixing-feeding can mean to you and your way of life.
